What is this product?

Type The Company is an open-ended umbrella investment company with variable capital incorporated with limited liability under the laws of Ireland, registered number 373807.

Objectives

Product objectives The Fund's objective is to seek long-term appreciation, through a combination of capital growth and income.

Investment approach The Fund will invest in medium- to long-term international debt securities, predominantly issued by issuers located in wealthy nations, in various currencies primarily listed on Recognised Markets in major financial markets. The Fund will invest in a broadly diversified range of debt securities such as notes, bills, bonds, commercial paper, certificates of deposit and floating rate notes issued by governments, institutions and corporations in both developed and developing markets. The Fund utilises macro-economic research to assist asset allocation combined with a Net Foreign Assets measure to specify an investable universe. Fixed income assets are also selected by a quantitative screen which identifies the best value investment opportunities based on credit quality and maturity. The Fund will usually hold debt securities with investment grade ratings (Baa3 or above by Moody's or BBB- or above by Standard and Poor's or equivalent credit ratings as determined by the Investment Manager). There is no maturity limitation. The Fund will be actively managed.

Benchmark The Fund's benchmark is the ICE BofAML Eurodollar Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The sub-investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Redemption policy Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Distribution policy Accumulating shares do not pay dividends. The annual result is capitalized (or reinvested). Income shares pay a dividend, insofar as the performance of the fund allows.

Exchange policy Subject to the conditions set down in the Prospectus, you are entitled to switch from one share class to another, either in the Fund or in another sub-fund of the Company. Please refer to the Prospectus for further information on how to switch.

Asset segregation The Fund is a sub-fund of the Company, an umbrella fund with segregated liability between sub-funds. You can find out more information about the umbrella fund in the Prospectus.

SFDR Article 6

Derivatives The Fund may use techniques and instruments for purposes of efficient portfolio management including reduction of risk or cost, or the generation of additional capital or income for the Fund, with a level of risk which is consistent with the risk profile of the Fund such as forward foreign currency exchange contracts, futures contracts, options, put and call options on securities, indices and currencies, swap contracts, repurchase/reverse repurchase agreements and/or stock lending agreements. The use of these instruments may result in the Fund being leveraged. However, the total exposure of the Fund as a result of all positions held by it will not exceed its Net Asset Value.

Intended retail investor The Fund is suitable for investors seeking capital growth and income over a 5- to 10-year time horizon with a medium level of volatility.

Term The Fund has no maturity date.

Practical information

Depository HSBC Continental Europe.

Further information The Net Asset Value of the Share Class is calculated in NOK and is available on Bloomberg, Morningstar and Reuters. The Prospectus and periodic reports are prepared in the name of the Company. Copies of the Prospectus and the latest annual and half-yearly report are available in English and free of charge from <https://www.newcapital.com/>>

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Credit risk: The issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due.

Interest rate risk: Investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period		3 Years	
Example Investment		NOK 10 000	
Scenarios		If you exit after 1 Year	If you exit after 3 Years (Recommended Holding Period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5 540 NOK	6 720 NOK
	Average return each year	-44.58%	-12.40%
Unfavourable	What you might get back after costs	7 120 NOK	7 520 NOK
	Average return each year	-28.84%	-9.07%
Moderate	What you might get back after costs	10 310 NOK	11 320 NOK
	Average return each year	3.13%	4.22%
Favourable	What you might get back after costs	11 550 NOK	12 390 NOK
	Average return each year	15.52%	7.41%

Unfavourable Scenario: This type of scenario occurred for an investment between (10/2019 - 10/2022).

Moderate Scenario: This type of scenario occurred for an investment between (06/2017 - 06/2020).

Favourable Scenario: This type of scenario occurred for an investment between (09/2013 - 09/2016).

The before-mentioned calculations were performed using benchmark ICE BofAML Eurodollar Index

What happens if EFG Asset Management (UK) Limited is unable to pay out?

If we are not able to pay you out what is owed to you, you are not covered by any national compensation scheme. To protect you, the assets are held for safekeeping in accordance with the UCITS Regulations with a separate company, a depository. In worst case, however, you would lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- NOK 10 000 is invested.

Investment NOK 10 000		
Scenarios	If you exit after 1 Year	If you exit after 3 Years (Recommended Holding Period)
Total Costs	142 NOK	493 NOK
Annual costs impact (*)	1.4%	1.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.71% before costs and 4.22% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0,0%, of the amount you pay in when entering this investment. This is the most you will be charged.	Up to 0 NOK
Exit costs	0,0%. We do not charge an exit fee for this product, but the person selling you the product may do so.	Up to 0 NOK
Ongoing costs taken each year		
Management fee and other administrative or operating costs	1.1% of the value of your investment per year. This is an estimate based on actual costs over the year	113 NOK

	ending 31 December 2022. This figure may vary from year to year.	
Transaction costs	0.3% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	29 NOK
Incidental costs taken under specific conditions		
Performance fees	0.0%. There is no performance fee for this product.	0 NOK

How long should I hold it and can I take my money out early?

Recommended holding period: 3 Years

This product is designed for longer term investments; you should be prepared to stay invested for at least 3 Years. However, you can redeem your investment without penalty at any time during this period, or hold the investment longer. Redemptions are possible on every working day; it will take 3 working days for you to be paid. The price per share for the day, based on the actual value of the Share Class, is set each day at 23:00 hours (Irish time).

How can I complain?

If you have any complaints, you can contact us on +44 (0)20 7412 3894 or email enquiries@newcapital.com. You can also send your complaint to the Fund's management company at complaints@kbassociates.ie. If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.
