What is this product?

Type The Company is an open-ended umbrella investment company with variable capital incorporated with limited liability under the laws of Ireland, registered number 373807.

Objectives

Product objectives The investment objective of the Fund is to achieve long-term capital appreciation primarily through investment in a portfolio of European equities.

Investment approach In seeking to achieve its investment objective, the Fund will primarily invest in equities of companies that have their registered office in the Europe ex-UK Region, the securities of which are listed or traded on Recognised Markets worldwide. The Fund will have a maximum exposure of 15% of its Net Asset Value to companies outside of the Europe ex-UK Region. The Fund may also invest in other collective investment schemes ("CIS") provided such investments are eligible for investment by UCITS and give exposure to investments in which the Fund may invest directly in accordance with the investment policy of the Fund. Investment in CIS shall not exceed in aggregate 10% of the Net Asset Value of the Fund.

Benchmark The Fund's benchmark is the MSCI Europe Ex UK Net Return EUR Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The sub-investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Redemption policy Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Distribution policy Accumulating shares do not pay dividends. The annual result is capitalized (or reinvested). Income shares pay a dividend, insofar as the performance of the fund allows.

Exchange policy Subject to the conditions set down in the Prospectus, you are entitled to switch from one share class to another, either in the Fund or in another sub-fund of the Company. Please refer to the Prospectus for further information on how to switch.

Asset segregation The Fund is a sub-fund of the Company, an umbrella fund with segregated liability between sub-funds. You can find out more information about the umbrella fund in the Prospectus.

SFDR Article 8

Derivatives The Fund will not invest in financial derivative instruments ("FDIs") for investment purposes. However, the Fund may use FDIs such as forward foreign currency exchange contracts, futures contracts, options, warrants, put and call options on securities, indices and currencies and/or foreign exchange swap contracts for hedging purposes.

Intended retail investor The Fund is suitable for investors seeking capital growth and income over a medium term with a high level of volatility.

Term The Fund has no maturity date.

Practical information

Depository HSBC Continental Europe.

Further information The Net Asset Value of the Share Class is calculated in USD and is available on Bloomberg, Morningstar and Reuters. The Prospectus and periodic reports are prepared in the name of the Company. Copies of the Prospectus and the latest annual and half-yearly report are available in English and free of charge from <https://www.newcapital.com/> >

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Hedging risk: The Fund utilises forward exchange rate contracts to minimise currency risk, forward contracts do not precisely mirror movements in the market exchange rate which can result in differences in performance between share classes.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product

and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period		5 Years	
Example Investment		USD 10 000	
Scenarios		If you exit after 1 Year	If you exit after 5 Years (Recommended Holding Period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	2 470 USD	2 330 USD
	Average return each year	-75.26%	-25.26%
Unfavourable	What you might get back after costs	6 900 USD	7 540 USD
	Average return each year	-31.05%	-5.50%
Moderate	What you might get back after costs	10 120 USD	11 860 USD
	Average return each year	1.16%	3.47%
Favourable	What you might get back after costs	13 140 USD	17 430 USD
	Average return each year	31.36%	11.75%

Unfavourable Scenario: This type of scenario occurred for an investment between (12/2021 - 11/2023).

Moderate Scenario: This type of scenario occurred for an investment between (11/2017 - 11/2022).

Favourable Scenario: This type of scenario occurred for an investment between (08/2016 - 08/2021).

The before-mentioned calculations were performed using benchmark MSCI Europe Ex UK Net Return EUR Index TMD

What happens if EFG Asset Management (UK) Limited is unable to pay out?

If we are not able to pay you out what is owed to you, you are not covered by any national compensation scheme. To protect you, the assets are held for safekeeping in accordance with the UCITS Regulations with a separate company, a depositary. In worst case, however, you would lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested.

Investment USD 10 000		
Scenarios	If you exit after 1 Year	If you exit after 5 Years (Recommended Holding Period)
Total Costs	800 USD	2 653 USD
Annual costs impact (*)	8.0%	4.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.73% before costs and 3.47% after costs.
