What is this product?

Type The Company is an open-ended umbrella investment company with variable capital incorporated with limited liability under the laws of Ireland, registered number 373807.

Objectives

Product objectives The Fund's objective is to deliver a consistent risk-adjusted return in all market environments over rolling 12-month periods.

Investment approach The Fund will gain exposure to a diverse global allocation of asset classes and may invest directly or indirectly in sovereign and corporate bonds, equities and commodities, infrastructure and property. Indirect exposure to these asset classes will, where applicable, be generated through investing in collective investment schemes, including exchange-traded funds (index-tracking funds that can be traded on exchanges just like a stock). Where the Fund invests in other collective investment schemes, underlying managers are selected first based on macro or micro economic views and then filtered based on data analysis using proprietary tools and supplemented by interviews with key decision makers and operating and liquidity risk scoring. No direct investment shall be made in commodities, infrastructure or property. The Fund is permitted to invest less than 10% of its NAV in China A shares which are listed on the Shanghai Stock Exchange using the Shanghai-Hong Kong Stock Connect or the Shenzhen Stock Exchange using the Shenzhen-Hong Kong Stock Connect. The sovereign and corporate bonds in which the Fund may invest may have fixed or floating rates of interest. No credit rating requirements will apply to these instruments and the Fund may generate exposure of more than 30% of net assets in bonds which constitute below investment grade securities. There will be no restrictions on the investment type, geographical or economic sector to which the Fund is exposed. However, any exposure to emerging markets will not exceed 30% of the Fund's net assets and up to 10% of net assets may be exposed to Russia. The Sub-Fund may also invest in contingent convertible bonds.

Benchmark The Fund's benchmark is the ICE BofA SONIA 1-Month Constant Maturity Index plus a risk premium of 3 percentage points per annum and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The sub-investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Redemption policy Shares in the Fund can be bought and sold daily (every Business Day of the Fund). Shareholders may request the repurchase of shares on any Redemption Day through various communication methods, and such requests are generally irrevocable unless otherwise approved.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose

Performance Scenarios

Redemption requests are subject to certain conditions, including the completion of necessary documentation and compliance with anti-money laundering procedures. Redemption fees will not be levied by the Company, however charges of this nature may be levied by third party nominees, distributors or intermediaries.

Distribution policy Accumulating shares do not pay dividends. The annual result is capitalized (or reinvested). Income shares pay a dividend, insofar as the performance of the fund allows.

Exchange policy Subject to the conditions set down in the Prospectus, you are entitled to switch from one share class to another, either in the Fund or in another sub-fund of the Company. Please refer to the Prospectus for further information on how to switch.

Asset segregation The Fund is a sub-fund of the Company, an umbrella fund with segregated liability between sub-funds. You can find out more information about the umbrella fund in the Prospectus.

SFDR Article 6

Derivatives policy The Fund may use derivatives for efficient portfolio management purposes only with a level of risk which is consistent with the risk profile of the Fund. Such instruments may include forward foreign exchange contracts index options and convertible securities. The leverage arising from the use of derivatives (including those embedded in any contingent convertible bonds) will not exceed the Net Asset Value of the Fund.

Intended retail investor This Fund is suitable for investors seeking a low to medium risk profile and a medium to long term investment (i.e. at least 3 to 5 years).

Term The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. Waystone Management Company (IE) is not entitled to terminate the product unilaterally. The Company may repurchase all shares at the determined repurchase price on the specified redemption day by providing shareholders with a notice period of four to twelve weeks.

money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other materially relevant risks not included in the summary risk indicator, please refer to the Prospectus for the descriptions: High Yield, Stock Connect, CIS, Contingent Convertible, Emerging Markets, Derivatives

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do

not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product

and a suitable benchmark over the last 16 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10 000 is invested.
