What is this product?

Type

The Product is a share of the Sub-fund Wellington India Focus Equity Fund (the "Fund") which is part of the Wellington Management Funds (Ireland) plc (the "Umbrella Fund"), an open-ended investment company with variable capital and segregated liability between Funds incorporated with registered number 267944 and is authorised in Ireland as a UCITS pursuant to the Regulations.

Term

The Umbrella Fund and the Fund do not have a fixed term or maturity period, but the Management Company, with the approval of the Depositary, is entitled to give notice of the Umbrella Fund's dissolution at any time. In the event that the Management Company considers that changes in the political, economic, military, regulatory or business environments, or reductions in the scale of a Fund's total net assets compromise the effective management of a Fund, then the Management Company is empowered to liquidate the Fund at any time.

Objectives

The Fund seeks long-term total returns.

The Fund will be actively managed, seeking to outperform the MSCI India Index (the "Index") investing primarily in equity and equity related securities of companies that are incorporated or operating in India.

The Investment Manager focuses on what it believes are undervalued high-quality companies or companies that may be recognized as high-quality in the future. The Investment Manager defines a high-quality company as one able to sustain higher returns on capital due to a competitive advantage versus peers, such as a successful or difficult to replicate business model, demonstrated strong management capability, a leading brand, industry level barriers to entry, or a combination of these factors. The Investment Manager believes that investment in high-quality companies generates sustainable long-term capital appreciation over time.

The Fund may be concentrated in a relatively small number of securities and industry sectors and will be more concentrated in terms of country exposures and, as a result, may be more volatile than more broadly diversified funds.

The Fund will invest in shares and other securities with equity characteristics such as preferred stocks, convertible securities or depository receipts. The Fund may invest either directly or via derivatives.

While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The MSCI India Index ("the Index") serves as a reference benchmark for performance comparison purposes. Whilst Fund securities may be components of

the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index.

The Fund will seek to support certain social characteristics by assessing and promoting the adoption of appropriate practices among investee companies with regard to modern slavery risk management, including with regards to forced labour, child labour and debt bondage ("Modern Slavery"), through the application of Wellington Management Group's EM Modern Slavery Policy.

To further promote appropriate policies and practices with regard to child labour and forced labour, the Fund excludes companies which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour) due to known controversies regarding child labour or forced labour.

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the environmental or social characteristics of the Fund.

The currency of this Share class is different to the base currency of the Fund and so the performance of the Share class will be subject to the impact of the movement of the exchange rate between the currencies.

Income policy

Any income allocated to the Share class from the Fund is reinvested.

Dealing Frequency

Shares can be bought or sold daily in accordance with the Prospectus. The base currency of the Fund is USD.

Intended retail investor

The Fund is intended for basic retail investors with a long-term investment horizon seeking capital appreciation and who are able to bear capital loss. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Depositary

State Street Custodial Services (Ireland) Limited.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 5 out of 7 which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for full details about any other risks materially relevant to the fund not included in the summary risk indicator such as liquidity, sustainability and operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 GBP	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,350 GBP	1,260 GBP
	Average return each year	-86.50%	-33.92%
Unfavourable	What you might get back after costs	7,100 GBP	8,750 GBP
	Average return each year	-29.00%	-2.64%
Moderate	What you might get back after costs	10,780 GBP	14,380 GBP
	Average return each year	7.80%	7.54%
Favourable	What you might get back after costs	15,310 GBP	18,160 GBP
	Average return each year	53.10%	12.67%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2015 and 2020.

Moderate scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2017 and 2022.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2019 and 2024.

What happens if Wellington Luxembourg S.à r.l. is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the Management Company, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the 5 year holding period we have assumed the product performs as shown in the moderate scenario
- 10,000.00 GBP

	If you exit after 1 year	If you exit after 5 years
Total costs	184 GBP	1,272 GBP
Annual cost impact (*)	1.8%	1.8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.3 % before costs and 7.5 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Composition of Costs

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long-term investment; you should have an investment horizon of at least 5 years.

The Management Company shall redeem shares of this Fund at the redemption price on each dealing day. Redemptions of the applicable Fund will be effected at the valuation point on the relevant dealing day. The price is based on the net asset value per share of each class determined at the valuation point. Redemption requests received after the dealing deadline will be treated as having been received by the following dealing deadline unless otherwise determined by the Management Company.

Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares.
