Regulator : Commission de Surveillance du Secteur Financier (CSSF), Luxembourg  
Produced on 28/01/2024.

## What is this product ?

**Type**  
SICAV

**Term**  
The recommended holding period is 5 years.

### Objectives

The objective of DIGITAL FUNDS Stars Eurozone is to outperform the Eurozone markets, through the use of a model to identify the 'stars' performers. The Sub-Fund seeks to limit the Environmental, Social and Governance (ESG) impacts of its investments and to favour companies with the lowest exposure to ESG risks, taking into account their ability to manage these risks. The sub-fund will invest at least 80% in stocks from the main Eurozone member states followed by at least 3 brokers and whose capitalisation exceeds 100 million EUR. This investment universe will be further filtered for sustainability concerns. This will lead to a reduction of the investment universe by at least 20% by excluding companies that may be impacted by sustainability risks. The sub-fund will be invested across all markets capitalisation spectrum including large capitalisation companies. The sub-fund may enter into transactions which are undertaken for purposes other than hedging provided those transactions have no negative effect on the quality of the investment policy. The sub-fund exposure to the stock market will remain between 80% and 100%. The sub-fund will use momentum indicators such as the Price Momentum, a statistical concept measuring the significance of a price movement relative to the market, or the Earnings Momentum, that measures the strength of earnings estimates revisions. The stocks will also be evaluated on the basis of an in-house ESG scoring tool. An allocation of small and mid caps is incorporated into the portfolio. The MSCI EMU Net Return will serve as a reference benchmark solely for the calculation of performance fees. Due to the active nature of the management process and the full freedom of investment, the Sub-Fund's performance profile may deviate significantly from that of the MSCI EMU Net Return. The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

### Intended retail investor

The fund is designed for investors searching an exposure to the broad Eurozone equity market. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

## What are the risks and what could I get in return ?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

The fund invests in the all cap universe diversified across various sectors and may be subject to high fluctuations in value. Small and Mid stocks can be more volatile than blue-chip stocks. The risk category is therefore driven by small, mid and large cap stock fluctuations.

A portion of the fund is invested in less liquid instruments whose prices could fluctuate in certain market conditions.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario : This type of scenario occurred for an investment between December 2021 and December 2023

Moderate scenario : This type of scenario occurred for an investment between February 2015 and February 2020

Favourable scenario : This type of scenario occurred for an investment between June 2016 and June 2021

Your maximum loss would be that you will lose all your investment (premium paid).

### Recommended holding period : 5 years

#### Example Investissement 10 000 €

Scenarios :		1 year	5 years
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	<b>2 860 €</b>	<b>2 340 €</b>
	Average return each year	-71,38 %	-25,19 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>7 170 €</b>	<b>5 910 €</b>
	Average return each year	-28,31 %	-9,99 %
<b>Moderate</b>	<b>What you might get back after costs</b>	<b>9 810 €</b>	<b>10 610 €</b>
	Average return each year	-1,87 %	1,19 %
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>13 480 €</b>	<b>13 660 €</b>
	Average return each year	34,84 %	6,43 %

## What happens if J. CHAHINE CAPITAL is unable to pay out ?

Digital Funds being a separate legal entity, the product shares can still be redeemed even in case of a failure of J.Chahine Capital. In complement, J.Chahine Capital participates since 2016 to the Système d'Indemnisation des Investisseurs Luxembourg ('SIIL'), administered by the CPDI department of the CSSF, which allows eligible clients for a limited compensation up to an equivalent value of EUR 20 000. Further information can be found on the CSSF website at <https://www.cssf.lu/en/investor-compensation/>.

## What are the costs ?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does . The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).For the other holding periods we have assumed the product performs as shown in the moderate scenario

- € 10 000 is invested

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	720 €	1 945 €
<b>Annual cost impact (*)</b>	7.31 %	3.47 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.65 before costs and 1.19% after costs.

These figures include the maximum distribution fee that the person selling you the product may charge 5.00% of amount invested. This person will inform you of the actual distribution fee.

## Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	We charge a maximum entry fee of 5%. This is the maximum that might be taken out of your money before it is invested.	Up to 500 €
<b>Exit costs</b>	We do not charge an exit fee for this product	0 €
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	1.46% of the value of your investment per year. This is an estimate based on actual costs over the last year.	139 €
<b>Transaction costs</b>	0.85% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	81 €
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	The impact of the performance fee. We take 15% of investment's outperformance compared to its benchmark MSCI EMU Net Return.	0 €

## How long should I hold it and can I take money out early ?

Recommended holding period : 5 years.

Recommendation : this product may not be appropriate for investors who plan to withdraw their money within 5 years.

Your risk appetite and return expectations may lead you to keep the product for a longer period of time. Requests for redemptions can be placed on each valuation day. The redemption price per share will correspond to the applicable net asset value with no redemption fee. Withdrawing before the recommended holding period may have an impact on the expected performance of the investment. Further information on related costs is given in the 'What are the costs ?' section.

## How can I complain ?

For any complaint, you are first invited to liaise with your usual sales contact. Should the answer not be satisfactory, you can also write to J.Chahine Capital - Traitement des réclamations - 10-12 Boulevard F.D. Roosevelt - L2450 Luxembourg (Grand Duchy of Luxembourg). This procedure is free of charge. Our exhaustive complaint procedure is available on our website at <https://www.chahinecapital.com>.
