What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Sub-Fund's investment objective is to maximize the total return from a combination of income and capital growth by investing in fixed income securities. The Sub-Fund seeks to outperform the Bloomberg Euro-Aggregate Corporate Index (Bloomberg ticker: LECPTREU Index) on the recommended investment period.

The overall investment strategy of the Sub-Fund is to seek, in the medium term, a regular rate of total return consistent with the preservation of capital by investing in the Euro bond market and in other negotiable debt securities. The Sub-Fund will seek to select securities in the fixed income universe by exploring various compartments of this market, including but not limited to, corporate bonds, government bonds, convertible & exchangeable bonds, perpetual bonds. The Sub-Fund will invest mainly, directly or indirectly in fixed income securities issued or guaranteed by governments, corporate issuers, or supranational entities in the OECD. The Sub-Fund's fixed income portfolio may be composed of securities belonging to the "speculative grade" category with a limit at B- rating by Standard & Poor's for example or that are considered of a comparable credit quality by the Management Company. Non-rated debt securities may not exceed 20% of its net assets. Debt securities with a rating under B- grade (at the time of the purchase), will not exceed a total of 10% of the Sub-Fund's total assets. If a bond is downgraded to a rating under the B- grade, the relevant asset will not be sold unless, in the opinion of the Management Company, it is in the interest of Shareholders to do so. The Sub-Fund can be invested in fixed income securities denominated in USD or GBP at a maximum level of 50% of the net asset value, the currency risk hedged in the base currency of the fund. Consequently, the currency risk should not exceed 10% of the net assets. The Sub-Fund may also invest up to 60% of net assets in subordinated debts including up to 50% of its net assets in perpetual bonds (i.e., bonds without a maturity date). The Sub-Fund may invest up to 20% of its net assets in contingent convertibles bonds. The Sub-Fund will use all types of eligible derivatives instruments traded on regulated or OTC markets when these contracts are better suited to the management objective or offer lower trading costs. These instruments may include, but are not restricted to: futures, options, swaps, CDS on indices, CDS and currency forwards.

The Sub-Fund is actively managed. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant. The reference benchmark does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 2 years.

OTHER INFORMATION

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for 2 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: Example investment | | 2 years EUR 10 000 | | |
|---|--|-----------------------------|------------------------------|--|
| | | If you exit after 1 year | If you exit after 2 years | |
| Scenarios | | | | |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | | |
| Stress scenario | What you might get back after costs | EUR 8 860 | EUR 8 870 | |
| | Average return each year | -11.4% | -5.8% | |
| Unfavourable scenario | What you might get back after costs | EUR 8 860 | EUR 9 210 | This type of scenario occurred for an investment in the product between September 2020 and September 2022. |
| | Average return each year | -11.4% | -4.0% | |
| Moderate scenario | What you might get back after costs | EUR 10 110 | EUR 10 180 | This type of scenario occurred for an investment in the product between December 2014 and December 2016. |
| | Average return each year | 1.1% | 0.9% | |
| Favourable scenario | What you might get back after costs | EUR 11 010 | EUR 11 140 | This type of scenario occurred for an investment in the product between February 2016 and February 2018. |
| | Average return each year | 10.1% | 5.5% | |

The stress scenario shows what you might get back in extreme market circumstances.

What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

| Investment of EUR 10 000 | If you exit after 1 year | If you exit after 2 years |
|-------------------------------|--------------------------|---------------------------|
| Total costs | EUR 186 | EUR 278 |
| Annual cost impact (*) | 1.9% | 1.4% |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.3% before costs and 0.9% after costs.

COMPOSITION OF COSTS

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs | Up to 1.00% of the amount you pay in when entering this Investment. This is the most you will be charged. The person selling you the production will inform you of the actual charge. | Up to EUR 100 |
| Exit costs | We do not charge an exit fee for this product. | EUR 0 |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 0.77% of the value of your investment per year. This is an estimate based on actual costs over the last year. | EUR 77 |
| Transaction costs | 0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | EUR 0 |
| Incidental costs taken under specific conditions | | |
| Performance fees | 20.00% of the positive performance net of any fees above the Bloomberg Euro-Aggregate Corporate Index with High Water Mark The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years. | EUR 9 |

How long should I hold it and can I take my money out early?

Recommended Holding Period (RHP): 2 years.

The RHP was chosen to provide a consistent return less dependent on market fluctuations.
