### What is this product?

**Type:** Société d'investissement à capital variable (Lux)

#### Objectives

**Product objectives:** The fund aims to achieve capital growth in the long term by investing in healthcare securities focusing on the digitalisation of the healthcare sector.

**Investment approach:** The Fund invests in equities focused on the digitalisation of the healthcare sector worldwide but mainly US.

**Investment policy:** The Fund invests at least two-thirds of the net assets of Bellevue Digital Health in a portfolio of carefully chosen shares and other equity securities of companies whose business activities have a strong focus on the digitisation of the health sector or whose main activity involves holding investments in such companies or financing such companies and that have their registered office or carry out the majority of their economic activity in recognised countries. A maximum of one-third of the Fund's net assets may be invested in fixed- or floating-rate securities, convertible bonds and warrant bonds of issuers domiciled in qualifying countries. The Fund may engage in derivative transactions in order to achieve an efficient portfolio management, in particular also for hedging purposes.

**Benchmark:** The fund is managed actively without use of any benchmark.

**Redemption policy:** Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

**Distribution policy:** The fund does not pay dividends. Earned income is retained in the NAV.

**Exchange policy:** You can exchange your shares in the fund for shares in another fund of Bellevue Funds (Lux) SICAV, provided that the conditions for purchasing the respective share class are fulfilled.

**Asset segregation:** The assets of each fund of the fund are segregated. This means that each fund is liable only for its own losses and liabilities, and does not cover any loss or liability associated with other funds.

**Sustainability policy:** The fund takes into consideration environmental, social and governance (ESG) characteristics when implementing the aforementioned investment objectives.

**SFDR:** Article 8

**Derivatives policy:** The fund can carry out derivative transactions for the purposes of hedging, efficient portfolio management and the generation of additional income.

**Intended retail investor:** This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

**Term:** The PRIIP has no maturity date.

#### Practical information

**Depository:** CACEIS Investor Services Bank

**Further information:** A copy of the Prospectus and latest annual and semi-annual financial report in English and the latest Net Asset Value per Share are available free of charge upon request from [www.bellevue.ch](http://www.bellevue.ch), by email from [info@bellevue.ch](mailto:info@bellevue.ch), or by writing to Bellevue Asset Management AG, Seestrasse 16, CH-8700 Küsnacht.

### What are the risks and what could I get in return?

#### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

**Credit risks:** The fund can invest some of its assets in bonds. It is possible that the issuers of these bonds may become insolvent.

**Liquidity risk:** The fund may invest some of its assets in financial instruments that may in certain circumstances reach a relatively low level of liquidity, which can have an impact on the fund's liquidity.

**Risks arising from the use of derivatives:** The fund may conclude derivatives transactions. This increases opportunities, but also involves an increased risk of loss.

**Operational risks and custody risks:** The fund is subject to risks due to operational or human errors, which can arise at the investment company, the custodian bank, a custodian or other third parties.

**Counterparty risks:** If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the fund.

**China A-shares:** The sub-fund may invest in Chinese A-shares via the Stock Connect Program. The programs involve regulatory changes, volume restrictions and operational limitations that may lead to heightened counterparty risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances. **Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.**

### What happens if Waystone Management Company (Lux) S.A. is unable to pay out?

Waystone is a Société Anonyme and has been appointed as the Management Company of the Fund. The Fund is a Société d'Investissement à Capital Variable and its assets are segregated from those of the Management Company. The Fund has entrusted the Custodian with the safekeeping of its assets, which are held separately from the assets of the Custodian. Therefore, a default by Waystone will not affect the value of your investment in the product. You are not covered by a national compensation system.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10 000 is invested.

Investment CHF 10 000		
Scenarios	If you exit after 1 Year	If you exit after 5 Years
<b>Total Costs</b>	140 CHF	1 189 CHF
<b>Annual costs impact (*)</b>	1.4%	1.5% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.24% before costs and 10.71% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of costs
