WHAT IS THIS PRODUCT?

Type:

UCITS

Term:

This product is not subject to any fixed term.

Objectives:

The Fund is a financial product that promotes environmental and/or social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation. The Fund aims to generate income and capital appreciation by investing in currencies and a globally diversified portfolio of government bonds. The Fund is actively managed against the *FTSE World Government Bond Index (the "benchmark"). The Fund can invest in bonds (which may include inflation linked bonds) issued by governments, government agencies and supra-national agencies (such as the World Bank), irrespective of whether such bonds are included in the benchmark. The Fund will tend to purchase bonds with characteristics similar to those in the benchmark however, the investment strategy can lead to significant deviation from the benchmark in terms of country and currency weightings and duration, which can cause the return of the Fund to differ significantly from that of the benchmark. The Fund can invest in currencies using contracts on the spot and forward market, such as forward currency contracts (contracts to buy or sell a currency at a specified future time at an agreed price). Up to 20% of investments made by the Fund may be of lower quality than investment grade (for example, emerging market investments). The choice of assets is guided by value. You should be aware that, if you decide to purchase Shares, you will be relying on the expertise of the Fund's investment manager to select investments for the Fund. The possible gains and losses of the Fund may be increased through the use of financial derivative instruments such as forward currency contracts which are used by the Fund's investment manager to counteract currency exposure. These possible losses cannot exceed 100% of the value of the Fund. For more information about the Fund's investment policy see "Investment Objectives, Policies and Share Classes of the Funds" in the prospectus available from the administrator.

Intended Retail Investor:

The product is intended for investors for which an investment in a fund does not constitute a complete investment programme and who are looking to diversify their investments through exposure to developed and emerging market government and government related bonds and currencies, and that fully understand and are willing to assume the risks involved in the Fund's investment programme including an acceptance of moderate risk tolerance. This product is intended for investors who seek returns from both income and moderate capital appreciation; and who are willing to adopt a medium to long-term approach to their investment strategy, investing for a minimum of three years.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the fund to pay you.

The risk indicator assumes you keep the product for 3 years.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. Further information on the risks faced by the Fund is included in "Other Relevant Information" in this document and in "Risk Factors" in the prospectus.

*The Global Bond strategy (the "Product") has been developed solely by Colchester Global Investors Ltd. The Product is not in any way connected to or sponsored, endorsed, sold or promoted by the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). FTSE Russell is a trading name of certain of the LSE Group companies. All rights in the FTSE World Government Bond Index (the "Index") vest in the relevant LSE Group company which owns the Index. FTSE® is a trade mark of the relevant LSE Group company and is used by any other LSE Group company under license. TMX® is a trade mark of TSX, Inc. and used by the LSE Group under license. The Index is calculated by or on behalf FTSE Fixed Income, LLC or its affiliate, agent or partner. The LSE Group does not accept any liability whatsoever to any person arising out of (a) the use of, reliance on or any error in the Index or (b) investment in or operation of the Product. The LSE Group makes no claim, prediction, warranty or representation either as to the results to be obtained from the Product or the suitability of the Index for the purpose to which it is being put by Colchester Global Investors Ltd.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 11/2020 and 10/2023.

Moderate: This type of scenario occurred for an investment between 03/2016 and 02/2019.

Favourable: This type of scenario occurred for an investment between 01/2018 and 12/2020.

WHAT HAPPENS IF COLCHESTER GLOBAL INVESTORS (DUBLIN) MANAGEMENT LIMITED IS UNABLE TO PAY OUT?

You may face financial loss should the manufacturer or depository default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

| Investment 10 000 EUR | If you exit after 1 year | If you exit after 3 years |
|-----------------------|--------------------------|---------------------------|
| Total costs | 71 EUR | 214 EUR |
| Annual Cost Impact* | 0.71 % | 0.71 % |

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.77% before costs and 0.06% after costs.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|--|---|--------------------------|
| Entry costs | We do not charge an entry fee for this product. | N/A |
| Exit costs | We do not charge an exit fee for this product, but the person selling you the product may do so. | N/A |

| Portfolio transaction costs | 0.10% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 10 EUR |
| Incidental costs taken under specific conditions | | |
| Performance Fee | There is no performance fee for this product. | N/A |

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended minimum holding period: 3 years

The above mentioned period has been defined in accordance to the product characteristics. It is determined on the basis of the Fund's risk and reward profile. Your ideal holding period may be different from this minimum recommended holding period. We recommend that you discuss this with your advisor. If the holding period is shorter than the recommended minimum, this may have a negative impact on the Fund's risk and reward profile. You may request to redeem the units held at any moment, in accordance with the Prospectus of the Fund. Any costs are shown under "Composition of costs" above.
