## **INVESTMENT MANAGER'S REPORT**

#### INVESTMENT OBJECTIVES

The investment objectives of the Foord SICAV Sub-Funds are:

#### Foord International Fund

To achieve meaningful inflation-beating US dollar returns over rolling five-year periods from a conservatively managed portfolio of global equities, warrants, exchange traded funds, UCITS and other UCIs, interest bearing securities, commodities and cash instruments reflecting the Investment Manager's prevailing best investment view.

#### Foord Global Equity Fund (Luxembourg)

To achieve optimum risk-adjusted total return by investing in a diversified portfolio of global equities and other qualifying securities. The fund aims to achieve a higher total rate of return than the MSCI All Country World Net Total Return Index over a full market cycle, without assuming greater risk.

#### SIX MONTH MARKET REVIEW

Markets started the year tepidly, but six months in, investors have put aside key risks — stubborn inflation, higher interest rates, and the potential for recession — and piled into risk assets. Much of the share gains were concentrated in a narrow range of seven mega-cap technology sector names: Amazon, Microsoft, Apple, META, Alphabet, Nvidia, and Tesla. Fewer than 30% of companies recorded gains above the market average, resulting in the narrowest market in the past 20 years. Global geopolitical risks are elevated with deteriorating US-China relations and the war in Ukraine of prime importance.

Against this backdrop, global equities (+14.3%) rallied, with developed markets (+15.4%) outperforming emerging markets (+5.0%). US, European and Japanese equities led developed market returns. Chinese equities (-5.4%) weighed on emerging markets while Brazilian equities, Indian equities, South Korean equities and Taiwanese equities posted gains. Information technology (36.9%) and communication services sectors (25.4%) advanced most, while the energy sector (-2.3%) lagged.

Headline inflation has rolled over in most markets, but core inflation — which excludes volatile food and energy items — remains frustratingly high. Longer dated developed market bond yields moved up as investors demanded higher term premiums, but fell somewhat towards period end after the US Federal Reserve 'hawkishly paused' its rate hike programme. Industrial commodities including oil declined on expectations for slowing economic growth or recession. Gold gained as uncertainty surrounded the Fed's next rate move.

The US dollar weakened against the British pound (+5.7%), euro (+2.2%), and while strengthening against the Australian dollar (-1.8%) and Japanese yen (-8.7%) as investors anticipate the peak in interest rate differentials may now be behind us.

## **INVESTMENT MANAGER'S REPORT (continued)**

#### **PERFORMANCE**

During the period, Foord SICAV's equity strategies underperformed their respective benchmarks given their overweight position to Chinese equities, cyclically high cash positions and underweight exposure to the expensive US tech sector, which led the market rally. The multi-asset Foord International Fund has a lower weight to China, but it was also nevertheless a drag on performance in the period.

Core to Foord's investment philosophy is investing in businesses with sustainable competitive advantages, enduring franchise values, earnings sustainability, and durable business models. The global equity rally in the period has driven valuations back into the expensive territory, as markets seemingly ignore the risk of stubborn inflation, higher interest rates, and ultimately, the potential for recession. In contrast, we remain vigilant and cautious.

## **INVESTMENT MANAGER'S REPORT (continued)**

#### INVESTMENT THESIS

Foord is a fundamental earnings house that takes long-term views and patiently waits for prices to follow earnings. We do not trade on market sentiment. We are benchmark agnostic and confidently different from peers.

The Foord International Fund's managers expect to generate returns from asset allocation and security selection. Asset allocation involves long-term structural allocations and shorter-term tactical allocations. Long-term structural asset allocations are set by forecasting key economic variables and assessing the long-term attractiveness of each asset class relative to others. Tactical allocations use the same set of variables, but the managers place greater emphasis on prevailing valuations.

For the equity strategies, we construct the portfolios independently of the benchmark we are trying to beat. We may take sizable off-benchmark positions in businesses that offer a symmetric risk-reward profiles to protect investor capital and deliver a safe investment yield. Superior stock selection through the study of deep realities of businesses is the cornerstone of portfolio construction, along with risk management through the diversification of economic factors. The portfolios span key markets and sectors based on the managers' conviction of the future earnings of the securities the Sub-Funds own. In many cases, our expectations are very different from those of the market, which can lead to periods of under performance.

We believe that minimizing the permanent loss of capital is paramount to generating superior long-term returns. Managing the risk of loss is therefore our priority. Our commitment to investment stewardship and risk management underpins all that we do. While the future direction of markets is murky, our focus on finding long-term value serves as the guiding light in our quest for outperformance.

## **NOTE 3 - MANAGEMENT FEES**

(see detail at Sub-Fund level on pages 39-42 of this report under Technical Data and Other Information)

In consideration for its management company services provided to the Company, the Management Company is entitled to receive a management fee of a percentage of the net assets of the relevant Class in accordance with the rates disclosed in the latest prospectus.

This fee is accrued on each Valuation Day and is payable monthly in arrears out of the assets of the relevant Sub-Fund.

Out of such management fee, the Management Company will pay the investment management fee, central administration fees and distribution fee.

No management fee is charged to class X shares. The management fee is charged only once to avoid double-dipping. A Sub-Fund will pay the higher of the Class' management fee rate or the management fee rate of the target fund.

## **NOTE 4 - PERFORMANCE FEES**

(see detail at Sub-Fund level on pages 39-42 of this report under Technical Data and Other Information, below tables Technical Data of each Sub-Fund)

In respect of the performance fee share classes, the Investment Manager is entitled to a performance fee amounting to 15% of the money-weighted outperformance by the share class of the Benchmark return. A performance fee may be payable when the Sub-Fund a chieves negative a bsolute returns when exceeding the performance of the Benchmark. The fee is calculated based on the amount by which the Sub-Fund's net asset value before performance fee accrual (GAV) exceeds the notional net asset value of the Benchmark calculated on a money-weighted basis.

During periods of outperformance (i.e. when the performance of the Sub-Fund exceeds the Benchmark performance), the performance fee is accrued daily based on the net outperformance since the performance last crystallised and not from the point of subscription. The performance fee will crystallise (a) proportionately for each share redemption or (b) in full on 31 December annually. Crystallised fees will be paid promptly, but not later than 30 days after crystallisation. During periods of underperformance (i.e. when the performance of the Sub-Fund is below the Benchmark performance), no fee accrues. Underperformance is aggregated, carried forward and deducted from future outperformance. Cu mulative underperformance is thus recouped before a performance fee becomes payable. Money-weighted underperformance is reduced proportionately for each share redemption.

Performance fee will be charged based on unswung NAV, which will be net of all other fees and expenses, and will exclude the effect of subscriptions and redemptions.

No performance fees were charged for the period ended from 1 January 2023 to 30 June 2023.

Full Performance fee methodology is described in the current Prospectus.

#### Remuneration policies and practices

The Management Company has established and applies a Remuneration Policy and practices that are consistent with, and promote, sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profiles, rules, the Prospectus or the Articles of Incorporation nor impair compliance with the Management Company's obligation to act in the best interest of the Company ("the Remuneration Policy").

The Remuneration Policy includes fixed and variable components of salaries and applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profiles of the Management Company, the Company or the Sub-Funds. Within the Management Company, these categories of staff represent 20 persons.

The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company, the Company and the Shareholders and includes measures to avoid conflicts of interest.

In particular, the Remuneration Policy will ensure that:

- a) the staff engaged in control functions are compensated in accordance with the achievement of the objectives linked to their functions, independently of the performance of the business areas that they control;
- b) the fixed and variable components of total remuneration are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component;
- c) the measurement of performance used to calculate variable remuneration components or pools of variable remuneration components includes a comprehensive adjustment mechanism to integrate all relevant types of current and future risks.

## **TECHNICAL DATA AND OTHER INFORMATION (continued)**

#### **FUND PERFORMANCE**

(see detail at Sub-Fund level on pages 39-42 of this report under Technical Data and Other Information)

The performance of the period P is based on the Net As set Values as calculated on the last business day of the period P and P-1. Those Net As set Values reflect the market prices of the investments as of the last business day of the period P and P-1. The PTD ("Period-To-Date") performance measures the returns from the first business day to the last business day of the period. Historical performance is no indicator of current or future performance. The performance data given does not take into account commissions and costs, if any, incurred in the purchase or redemption of fund shares. The since inception performance is annualised. Performance of distributing shares includes reinvestments of dividends.

#### **TOTAL EXPENSE RATIO ("TER")**

(see detail at Sub-Fund level on pages 39-42 of this report under Technical Data and Other Information)

The TER expresses the sum of all costs and commissions charged on an ongoing basis to the Company's or Sub-Fund's assets, taken retrospectively as a percentage of the average assets. The TER is calculated following the AMAS (Asset Management Association) guideline. For a newly launched share class (i.e. launched less than 12 months ago), the calculation of the TER is annualised.

If a Sub-Fund invests a significant portion of its net assets as a fund of fund in target funds, a composite (synthetic) TER of the fund of funds as of the closing date is the aggregate of:

The TER of the individual target funds, weighted based on their proportion in the NAV of the fund of funds as of the closing date minus the retroceded commissions received from the target funds during the reporting period.

The synthetic TERs are not disclosed in these financial statements as the percentage of holding in each target fund is less than 10% of the NAV.
