#### 2 Accounting principles

#### a) Financial statements

The financial statements have been drawn up in accordance with Luxembourg legal provisions relating to investment funds.

#### b) Valuation of the assets

- i. The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforementioned and not yet received shall be deemed to be the full amount thereof, unless it is possible that the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at by deducting a sum that the Company considers appropriate in such case to reflect the true value thereof.
- ii. The value of all securities and/or derivative financial instruments listed or traded on the exchange is based on the last-known price on the day before the valuation day. Exceptions to this are the securities and/or derivative financial instruments held by the Sub-Funds specified in the Special Part of the Sales Prospectus, which, in accordance with their investment policy, are invested in Asia and the Far East and the value of which is measured on the basis of the last-known price at the time of valuation on the valuation day.
- iii. The value of securities and/or derivative financial instruments traded on other regulated markets shall be calculated on the basis of the closing price on the day preceding the valuation day.
- iv. If any of the securities and/or derivative instruments in the Fund's portfolio on the relevant valuation day are neither listed or traded on any official stock exchange nor on any other regulated market or if, the price as determined pursuant to paragraphs ii. and iii. is not representative of the fair market value of the relevant securities and/or derivative instruments listed or traded on an official stock exchange or other regulated market, the value of these securities and/or derivative instruments shall be determined prudently and in good faith based on a value resulting from the application of the recognized valuation rules or models.

#### 2 Accounting principles (continued)

- v. For fixed-income or variable-rate money market paper and securities with a residual term to maturity of less than three months, the valuation price may be successively adjusted to the redemption price, taking the net purchase price as a starting point, while maintaining the resulting yield. The valuation price calculated using this method may differ from the actual market price, if it can be ensured that this will not lead to a material difference between the actual value of the security and the adjusted valuation price. Where significant differences in market conditions exist, the basis for valuing the individual investments will be adapted in line with new market yields.
- vi. Units or shares in undertakings for collective investment shall be valued at the last available net asset value.
- vii. In the event that the above valuation methods should prove inappropriate or misleading, the Board of Directors may adjust the value of the investments or allow the use of a different valuation method for the Fund's assets.

The Board of Directors is entitled to temporarily apply other generally recognized valuation methods that are used in good faith and are verifiable by the Fund's auditors in order to calculate the assets of the Fund and/or the assets of a Sub-Fund if the aforementioned valuation criteria appear to be impossible or inexpedient due to exceptional circumstances, or if this is in the interests of the Fund or a Sub-Fund and/or shareholders (e.g. to avoid market timing) to achieve an appropriate valuation of the Fund and/or the Sub-Fund concerned.

#### c) Net realised gain/loss on the sale of securities

Realised net profits and net losses from the sale of securities are calculated on the basis of average costs. Realised profits and losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on investments".

Changes in unrealised gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on investments".

#### d)Income

Dividends are recognised as income in the statement of net income / loss on the day on which the security is first listed as ex-dividend, provided this information is available to the Fund. Accrued interest is allocated on a daily basis. Coupons received from the issuers of the underlying securities are included in the position "Net interest on bonds". Dividends received from the issuers of the underlying securities are included in the position "Net dividends receivable for the Fund are booked to "Receivable on interest and dividends".

#### e) Valuation of forward foreign exchange contracts

Forward foreign exchange contracts are valued on the basis of the forward foreign exchange rates on the valuation date. Realised net profits and net losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on forward foreign exchange contracts".

Changes in unrealised gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on forward foreign exchange contracts".

The outstanding forward foreign exchange contracts are shown in Note 10.

#### f) Combined financial statements

The reference currencies of the Sub-Funds are converted into Euro to produce combined financial statements (annual and semi-annual reports) that comply with provisions under Luxembourg Law.

#### g) Conversion of items in foreign currencies

Cash at banks, financial instruments as well as other assets / liabilities that are expressed in currencies other than the reference currency of the different Sub-Funds, are converted at the last known exchange rate on the valuation day. Income and expenses expressed in currencies other than the reference currency of the different Sub-Funds are converted at the exchange rate on the payment day. Realised profits and losses on currency exchanges are reported in the statement of operations and changes in net assets under "Net realised gain/loss on currency exchange".

The acquisition cost of securities expressed in currencies other than the reference currency of the different Sub-Funds will be converted at the exchange rate of the acquisition date.

#### 2 Accounting principles (continued)

#### h) Formation expenses and placement fees

The formation expenses for the Fund have been allocated to the individual Sub-Funds in proportion to their initial subscription amounts and were written off in full over a period of five years.

For the Sub-fund Variopartner SICAV - Vontobel ESG Global Allocation, a placement fee was charged at the launch date (1,8% of the initial net asset value) and has been amortized over the following three years (ending on January 31, 2025).

#### i) Taxation

With the exception of the "taxe d'abonnement" (subscription tax) listed under Note 4, the Fund is not subject to any Luxembourg taxes. However, in accordance with the applicable foreign legislation, the Fund may be subject to capital gains taxes and withholding tax on interest and dividend income at differing rates.

For the purpose of disclosure, non-refundable withholding taxes are deducted from the gross dividends/interest amounts. Capital gains taxes are deducted from sales proceeds as a reduction in realised profits.

#### 3 Management Fee

The Sub-Funds pay a "Management Fee", which covers all costs relating to possible services rendered in connection with investment management and distribution and is payable at the end of every month. This Management Fee is calculated based on the average of the daily net asset values of the Sub-Fund concerned during the relevant month. The applicable fee rates for each Sub-Fund are defined in the Special Part of the Sales Prospectus.
