NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) General

The financial statements are prepared in accordance with generally accepted accounting principles and with the legal and regulatory reporting requirements applicable in Luxembourg relating to Undertakings for Collective Investment.

b) Foreign exchange translation for each Sub-Fund

Cash at banks, other net assets and liabilities as well as the market value of the investment portfolio expressed in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the exchange rate prevailing at the end of the period.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the exchange rate prevailing at the transaction date.

Net realised gain/loss and change in net unrealised appreciations and depreciations on foreign exchange are included in the statement of operations and changes in net assets.

c) Presentation of financial statements

The reference currency of the Company is the Euro ("EUR").

Notes to the financial statements as at June 30, 2023 (continued)

The accounting year of the Company closes on December 31 of each year.

d) Combined financial statements of the Company

The combined financial statements of the Company are expressed in EUR and correspond to the sum of items in the financial statements of each Sub-Fund, converted into EUR at the exchange rate prevailing at the closing date.

e) Valuation of assets of each Sub-Fund

- 1) The value of any cash on hand or on deposit, bills and demand notes payable and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.
- 2) The value of assets which are listed or dealt in on any stock exchange is based on the last available price on the stock exchange which is normally the principal market for such assets.
- 3) The value of assets dealt in on any other regulated market is based on the last available price.
- 4) In the event that any assets are not listed or dealt in on any stock exchange or on any other regulated market, or if, with respect to assets listed or dealt in on any stock exchange, or other regulated market as aforesaid, the price as determined pursuant to sub-paragraph (b) or (c) is not representative of the fair market value of the relevant assets, the value of such assets is based on the reasonably foreseeable sales price determined prudently and in good faith.
- 5) The liquidating value of futures, forward or options contracts not traded on exchanges or on other regulated markets means their net liquidating value determined, pursuant to the policies established by the Board of Directors of the Company, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on exchanges or on other regulated markets is based upon the last available settlement prices of these contracts on exchanges and regulated markets on which the particular futures, forward or options contracts are traded by the Company provided that if a futures, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors of the Company may deem fair and reasonable.
- 6) The value of money market instruments not listed or dealt in on any stock exchange or any other regulated market and with remaining maturity of less than 12 months and of more than 90 days is deemed to be the nominal value thereof, increased by any interest accrued thereon. Money market instruments with a remaining maturity of 90 days or less are valued by the amortized cost method, which approximates market value.
- 7) Interest rate swaps are valued at their market value established by reference to the applicable interest rate curve.
- 8) Units or shares of open-ended UCI are valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price is determined by the Board of Directors of the Company on a fair and equitable basis. Units or shares of a closed-ended UCI are valued at their last available stock market value.

Notes to the financial statements as at June 30, 2023 (continued)

9) All other securities and other assets are valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors of the Company or a committee appointed to that effect by the Board of Directors of the Company.

f) Net realised gain/loss on sales of investments

The net realised gain/loss on sales of investments is calculated on the basis of the weighted average cost of the investments sold.

g) Cost of investment securities

Cost of investment securities in currencies other than the currency of the Sub-Fund is converted into the currency of the Sub-Fund at the exchange rate applicable at purchase date.

h) Income

Dividends are recorded net of withholding tax at ex-date. Interest is recorded on an accrual basis.

i) Recognition of futures contracts and contracts for difference

At the time of each NAV calculation, the margin call on futures contracts and contracts for difference is recorded directly in the realised capital gains and losses accounts relating to futures contracts and contracts for difference by the bank account counterparty.

j) Accounting of futures contracts and contracts for difference

Unrealised appreciations/depreciations on futures contracts and contracts for difference are settled daily through the reception/payment of a cash amount corresponding to the daily increase/decrease of the market value of each opened futures contract and contract for difference. Such cash amount is recorded under the caption "Cash at banks" in the statement of net assets and the corresponding amount is recorded under the caption "net realised gain/loss on futures contracts and CFD" in the statement of operations and changes in net assets.

k) Equity swaps

Swaps are valued according to the mark-to-market method and verified against the value from the counterparty. The Company accrues interim payments on swap contracts on a daily basis. At the end of each month, interim payments are settled in cash. The payment flows are netted against each other, with the difference being paid by one party to the other. The net amount is recorded as realised result on swaps and is included in the account "Net realised gain/loss on swaps" in the statement of operations.

I) Transaction fees

The transaction fees represent the costs incurred by each Sub-Fund in connection with purchases and sales of investments.

Transaction fees include brokerage fees as well as bank commissions, tax, depositary fees and other transaction fees, and are included in the statement of operations and changes in net assets.

Notes to the financial statements as at June 30, 2023 (continued)

m) Formation expenses

Formation expenses are amortised over a maximum period of five years.

NOTE 3 "TAXE D'ABONNEMENT"

Under legislation and regulations currently prevailing in Luxembourg, the Company is not subject to any tax on income. The Company is subject to a subscription tax ("taxe d'abonnement") on its net assets at an annual rate of 0.05% (except for the Share Classes which are specifically dedicated to institutional investors, which benefit from the reduced rate of 0.01% per annum) payable quarterly and calculated on the total net asset value of each Class at the end of the relevant quarter.

In certain instances depending on the country of origin, the Company pays withholding tax on dividends received. However, Luxembourg does not impose a withholding tax on dividends paid from the Company to Shareholders.

NOTE 4 MANAGEMENT FEES

In payment of its services, the Management Company receives a management fee computed and reserved on each valuation day based on the value of the net assets of each Sub-Fund and paid out on a monthly basis. The management fees include all fees paid to the Administration Agent, the Depositary Bank and the Investment Manager.

NOTE 5 PERFORMANCE FEES

A performance fee calculation is carried out for each class and accrued on each valuation day, i.e. it is included in the net asset value of the Sub-Fund, based on the cumulative net excess return for that particular Share Class i.e. after fees and expenses and above the benchmark hurdle. Only where there is a positive cumulative net excess return at the accounting year-end or the end of the Shareholder holding period (if shorter) will a performance fee become payable to the Management Company.

The performance fee is accrued on each valuation day and deducted as an expense from the net asset value of the relevant class. At the end of the accounting year, any accrued performance fee will crystallise and become payable to the Management Company. Accrued performance fee payable to the Management Company at the end of the accounting year may not exceed 5% of the accounting year average net asset value of the relevant class.

The Sub-Fund performance is determined on the basis of the change in NAV per Share after the deduction of the fixed management fee.

Performance fee applicable to equity Sub-Funds

The performance fee calculation is subject to a benchmark hurdle, i.e. the highest cumulative net excess return that a Share Class has had since its inception/reset. This benchmark hurdle must be exceeded before a performance fee is accrued. A performance fee could therefore be paid even if the net asset value per share has decreased, as the performance fee is calculated based on relative return, and not absolute return.

Where there is a positive cumulative net excess return at the end of the accounting year and a performance fee becomes payable to the Management Company, the new benchmark hurdle will be the cumulative net excess return on the last business day of the accounting year. However where the class has underperformed over the full accounting year, no performance fee will be charged and the benchmark hurdle will remain unchanged from the prior accounting year.

Where the relevant class underperforms the benchmark hurdle, any underperformance is tracked and has to be recovered by any subsequent outperformance before a performance fee can be accrued. Where there is already a performance fee accrual during the accounting year, the accrual will be reduced to reflect any subsequent underperformance, although this will not be reduced below zero. However, where there is outperformance over the full accounting year which results in a performance fee being charged, and this is followed by underperformance in subsequent accounting years, there will be no refund of prior year performance fees.

³ Since March 9, 2023

Notes to the financial statements as at June 30, 2023 (continued)

Performance fee applicable to alternative investment Sub-Funds and multi-asset Sub-Funds

The performance fee calculation is subject to a high water mark, i.e. the highest cumulative net excess return that a share class has had since its inception/reset, which must be exceeded before a performance fee is accrued. The high water mark for each class will initially be set equal to the value of the share class at launch.

In addition to the high water mark, the performance fee calculation is also subject to a benchmark hurdle based on the reference benchmark rate. This benchmark hurdle is applied to the high water mark to calculate an adjusted high water mark, which must be exceeded before a performance fee is accrued.

Where there is a positive cumulative net excess return at the end of the accounting year and a performance fee becomes payable to the Management Company, the high water mark will be reset to the net asset value per share on the last business day of the accounting year. However where the class has underperformed over the full accounting year, no performance fee will be charged and the high water mark will remain unchanged from the prior accounting year.

Where the relevant class underperforms the adjusted high water mark, any underperformance is tracked and has to be recovered by any subsequent outperformance before a performance fee can be accrued. Where there is already a performance fee accrual during the accounting year, the accrual will be reduced to reflect any subsequent underperformance, although this will not be reduced below zero. However, where there is outperformance over the full accounting year which results in a performance fee being charged, and this is followed by underperformance in subsequent accounting years, there will be no refund of prior year performance fees.

The Investment Manager is entitled to receive performance fees in regards to the below Sub-Funds. It amounts to 20% of the excess yield in relation to the Sub-Fund's benchmark index. The benchmarks for the Sub-Funds entitled to performance fees are the following:

A further distinction is made regarding the potential investors in such shares. The shares may either be distributed to retail investors (Share Classes "Retail A", "Retail A (N)", "Retail B" and "Retail B (N)") or institutional investors (Share Classes "Institutional A" and "Institutional B").

The issue price of shares in a Sub-Fund ("Issue Price") is equal to the net asset value of a share in that Sub-Fund, increased by an issue commission of maximum 5% of the subscribed amount (excluding Institutional Classes (if any)). This Issue Price includes all commissions payable to banks and financial institutions taking part in the placement of shares.

Notes to the financial statements as at June 30, 2023 (continued)
