2. Summary of significant accounting principles

Presentation of the financial statements

The Company's financial statements are prepared in accordance with the generally accepted accounting principles in Luxembourg and the Luxembourg regulations relating to undertakings for collective investment in transferable securities.

a) Foreign currency translation

Investments, as well as other assets and liabilities stated in foreign currencies, are converted at the exchange rates on 31.10.2024. Transactions in foreign currencies during the period are converted at the rates prevailing on the date of the transaction. Net realised gains and losses and net variation in unrealised appreciation/depreciation are recorded in the statement of operations and changes in net assets of each sub-fund.

b) Investments

Securities that are traded on a stock exchange or another regulated secondary market are valued at the last known market price. Where securities held in the portfolio are not traded on a stock exchange or on another regulated market, or where the price provided is not representative or appropriate, the securities in question shall be valued at a commensurate and realistic selling price that is prudently calculated in good faith by the Board of Directors of the Company. In the sub-fund JSS Investmentfonds II - JSS Sustainable Bond - Global Convertibles, Bonds, which are classified as Other Transferable Securities in the Statement of investments, are priced in accordance with the following hierarchy agreed with the Central Administration of the Company: 1. SWEX Mid, 2. Interactive Data Evaluated Prices Mid, 3. Reuters Evaluated Mid, 4. XTRAKTER Mid, 5. JP MORGAN PRICINGDIRECT Mid.

c) Investment funds

Shares or units in open-ended investment funds are valued on the basis of their last available net asset value.

d) Forward exchange contracts

Forward foreign exchange contracts are valued at forward market rates for the remaining period from valuation date to the maturity of the contract. Unrealised gains or losses arising at the time of reporting from the valuation of open forward foreign exchange contracts are taken into account in the statement of net assets and in the statement of operations and changes in net assets.

e) Term deposits

Term deposits shall be valued at their nominal value increased by accrued interest.

f) Liquid assets and money market instruments

Liquid assets and money market instruments can be valued at their nominal value plus accrued interest or in consideration of scheduled amortisation of historical costs. The latter method can lead to temporary discrepancies between values and the prices that the fund in question would receive on selling the investment. The Company shall constantly review this valuation method and recommend any necessary changes to ensure that the valuation of these assets results in an appropriate value that can be determined in good faith according to the procedures laid down by the Board of Directors. If the Company takes the view that deviation from the scheduled amortisation of historical costs per share would lead to considerable dilution or other undesired effects for shareholders, it must make any corrections it considers appropriate to avoid or restrict dilution or other undesired effects, where this is possible and reasonable.

g) Rounding differences

The figures included in the tables in this semi-annual report including audited financial statements may be affected by rounding differences (unit, % etc.).

h) Contracts for Difference "CFD" trades

CFD trades are valued at the market price on the valuation date. Unrealised gains or losses resulting at the closing date from the valuation of CFDs are taken into account in the statement of net assets, the Net realised gain/loss and change in Net variation in unrealised appreciation/depreciation are presented in the statement of operations and changes in net assets.

3. Net asset value

a) Computation

The net asset value per share is expressed in the currency of the relevant share class and is calculated daily by dividing the net assets of the relevant share class by the number of shares issued and outstanding in each share class. The net asset value of the fund's assets on day D is calculated based on the market prices of day D, but published on day D+1. The acquisition cost of securities sold is calculated using the method of weighted average price.

b) Redemption of shares

Each shareholder of a sub-fund may request that their shares be redeemed at the net asset value per share at any time.

Notes to the Financial Statements as at 31.10.2024 (continued)

3. Net asset value (continued)

c) Issue of shares

The subscription price is calculated as follows:

- The net asset value per share of the relevant sub-fund
- A maximum commission of 3.00% for share classes P and C (maximum 0.00% for share class I).

d) Conversion of shares

Each shareholder has the right, in accordance with the terms and conditions outlined in the detailed and simplified prospectus, to switch from one sub-fund to another.

e) Single Swing Pricing

If the sum of all subscriptions and/or redemptions of all the share classes of a sub-fund results in a net capital inflow or outflow, the net asset value of the sub-fund in question may be increased or reduced on this trading day (so-called single swing pricing). The net asset value may not be adjusted by more than 3%. The percentage to be applied to individual sub-funds is defined by a committee determined by the Board of Directors. This adjustment leads to an increase in the net asset value if the net movements lead to an increase in the number of shares of the sub-fund in question. It results in a reduction of the net asset value if the net movements lead to a reduction in the number of Shares. The Board of Directors may determine a threshold for each sub-fund. This threshold may be derived from the net movements on a given trading day relative to the sub-fund's net assets or an absolute amount in the currency of the respective sub-fund. The net asset value would therefore not be adjusted unless this threshold is breached on any given trading day.

7. Depositary fees

The depositary receives fees in accordance with customary Luxembourg banking practice.

8. Service fees

The Management Company receives a service charge of up to 0.25% p.a. based on the net assets for all issued share classes. The service charge actually levied is set for each share class by the Company's registered office or the distributors. CACEIS Bank fees are paid out of these fees.

9. Total Expense Ratio (TER)

The TER has been determined in accordance with the "Directive on the calculation and disclosure of TER" of the Swiss Funds and Asset Management Association (SFAMA) in the version dated 24.04.2015.

Depending on the circumstances, transaction costs are either included in the purchase price of the securities and/or reported separately in the statement of operations and changes in net assets. These costs, which in accordance with the above-mentioned Directive are not part of operating expenses (see point 3 of the Directive), are therefore not taken into account in the TER calculation.
