# General Information

UBS (Irl) ETF plc (the "Company") is an open-ended investment company with variable capital which was incorporated in Ireland on 14 December 2011 under registration number 507439 and is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS"). The objective of the Company is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) (the "Central Bank UCITS Regulations"). References to statutes, regulations and laws shall include any amendments thereto.

All capitalised terms not defined herein shall have the meaning attributed to them in the latest Prospectus for the Company.

The Company has been structured as an umbrella fund, with segregated liability between sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of Shares representing separate portfolios of assets, each comprising a fund (each a "Fund", collectively the "Funds"). The portfolio of assets maintained for each series of Shares and comprising a Fund will be invested in accordance with the investment objectives and policies applicable to such Fund as specified in the relevant supplement to the Prospectus, and each relevant supplement shall include all such relevant information in relation to the additional Fund or Funds as the Directors may deem appropriate and the Central Bank requires to be included. Each Fund will bear its own liabilities and, under Irish law, none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner or liquidator, or any other person will have access to the assets of a Fund in satisfaction of a liability of any other Fund.

Shares of any particular series may be divided into different Classes to accommodate different dividend policies, charges and/or fee arrangements (including different flat fees) and/or currencies. The Company may establish Classes that provide for foreign exchange hedging in accordance with the policies and requirements of the Central Bank from time to time. While it is anticipated that applications will be made for most of the Classes to be admitted to listing on one or more Listing Stock Exchange, the Company may also establish Classes of Unlisted Shares.

## Replication Strategy

Our approach to passive equity investment is to target full replication where possible, depending on the characteristics of the benchmark index, the size of portfolio and the desired tracking accuracy. In some situations, the Investment Manager may utilise stratified sampling where the Investment Manager deem this to be more efficient.

In practice, the majority of our Equity ETFs target full replication (holding all or virtually all the underlying constituents at weights at or close to the index). As at 30 June 2024, no funds were considered sampled.

MSCI notes that the following Indexes were affected by a technical implementation issue from their respective launch dates until 1 December 2023 which resulted in a greater number of index constituents than was prescribed by methodology. This issue has been corrected on an ongoing basis as of 1 December 2023 and the effect did not undermine the stated objectives of the Index nor any of its defining risk characteristics.

Historical performance is no indicator of current or future performance. The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

<sup>a</sup> Fund performance reflects percentage change in NAV's per share (cum dividend) over the financial period.

<sup>b</sup> Total Net Return of the Index.

<sup>c</sup> The tracking difference is attributable to Fund Expenses (see Note 2 to the financial statements) as well as non-reclaimable withholding taxes and to generation of securities lending income. The Funds' portfolio manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Fund and that Fund's index will not exceed 1% under normal market conditions. However, exceptional circumstances may arise which cause a Fund's tracking accuracy to exceed 1%. None of the Funds had a tracking difference of more than 1% over a 12-month financial period.

<sup>d</sup> Total Expense Ratio (TER) or the flat fee is calculated in accordance with the Asset Management Association Switzerland (AMAS) "Guidelines on the calculation and disclosure of the TER of collective investment schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets. For terminated and newly launched share classes the total operating expense figure included in the flat fee has been annualised.

<sup>e</sup> Tracking Error: annualised standard deviation. The Fund's portfolio manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Fund and that Fund's index, below or equal to 1% under normal market conditions. However, exceptional circumstances may arise which cause a Fund's tracking error to exceed 1%. Additionally, in relation to certain Funds through the composition of that Fund's Index, it may not be practicably possible, for

example because of the Company's investment restrictions, to achieve such a tracking error. It is anticipated for most Funds, especially those where the Index's component securities are listed on one or more highly liquid and efficient Recognised Markets, that the tracking error will be significantly lower than 1%. In relation to those certain Funds where such accuracy is not practicably possible, it is anticipated that the annual tracking error will be no more than 3%. There were no tracking errors exceeding 1% in the last 12 months. Tracking error calculation: The tracking error for the last 12 months is calculated as follows:  $\text{STANDARD DEVIATION (Monthly Excess calculated each month over a 12-month financial period)} \times \text{SQURE ROOT (12)}$ .

# Investment Objectives & Policies

## *MSCI USA UCITS ETF*

The objective of the Fund is to seek to track the equity market performance of the U.S. market. The investment policy of the Fund is to seek to track the performance of the MSCI USA Index.

## *MSCI USA Value UCITS ETF*

The objective of the Fund is to seek to track the equity market performance of U.S. equities, which are categorised as value stocks using eight historical and forward-looking fundamental data points. The data points are broken down into value investment style characteristics and growth investment style characteristics and, in constructing the index, MSCI use them to identify which stocks exhibit stronger value characteristics (i.e., are priced at a low level relative to what is considered to be their fundamental value). The value investment style characteristics are (i) book value to price ratio, (ii) 12-month forward earnings to price ratio and (iii) dividend yield. The growth investment style characteristics are (i) long-term forward earnings per share (EPS) growth rate, (ii) short-term forward EPS growth rate, (iii) current Internal Growth Rate, (iv) long-term historical EPS growth trend and (v) long-term historical sales per share (SPS) growth trend. The investment policy of the Fund is to seek to track the performance of the MSCI USA Value Index.

# Investment Manager's Report

## For the six months financial period ended 30 June 2024

### Equities

#### Quarter One 2024

Global stocks had the best first quarter in five years, amid optimism over the outlook for the US economy and hopes that AI will boost corporate profits. The MSCI All Country World Index gained ground for the fifth consecutive month, for a total return of 3.1% and a quarterly return of 8.2%.

While all major markets gained ground in March, developed markets led the way. The S&P 500 returned 3.2% for the month, taking its advance so far in 2024 to 10.6%. The index has closed at a record high 22 times so far this year, ending the quarter at its highest-ever level. The rally in March was also more balanced. The S&P 500 Equal Weight Index – which dilutes the impact of the mega-cap growth and tech stocks – gained 4.5% in the month. But for the quarter overall, tech enthusiasm led markets higher. The FANG+ index, which tracks the performance of the top 10 most-traded tech stocks, gained 14.7% in the first quarter – building on an 18.3% advance in the fourth quarter of 2023. Other leading equity markets around the world were also moving into uncharted territory. The MSCI Eurozone index ended the quarter at a record high, for a return of 10.3%. Japan remained a leader, with the MSCI Japan gaining 19.2% in the quarter. Confidence in China remained fragile. A 1.1% return in March made MSCI China the worst performing major market in the month. Its loss of 1.7% for the first quarter made China the only market still in negative territory for 2024.

#### Quarter Two 2024

The first half of 2024 ended on a high note, with global equities returning 2.6% in June. That took the gain for the MSCI All Country World to 13.5% for the first half of the year. Gains were led by the S&P 500, which returned 3.6% in June, leaving its year-to-date advance to 15.3%.

Since the rally started in late October 2023, global stocks have only lost ground in one month—April. But the rally in June was uneven, with several notable laggards. The US continued to dominate, with a 3.6% gain over the month and 15.3% so far in 2024. Optimism over inflation and AI were the main drivers—despite a period of volatility for some of the leading names in the field. However, both Europe and China were a drag on global performance. In the Eurozone, political concerns weighed on performance and sentiment after French President Emmanuel Macron called a snap election.

With his centrist coalition losing ground to both right- and left-wing parties in the first round of the parliamentary elections, investors worried about France's fiscal position in the event of a change of government. In June a 6.4% slide in the CAC 40, France's equity benchmark, dragged the MSCI EMU to a 2.4% loss, making it the worst performing major regional market. Also, MSCI China fell 1.9% in June, breaking a string of four consecutive monthly gains. That pared the first half gains of the index to 7.1% over the quarter and 5.2% year-to-date. The UK market, which had also been regaining lost ground in recent months, delivered a monthly loss of 1%. However, the MSCI UK index stands up 3.6% over the quarter and 7.8% year-to-date. Swiss stocks declined 0.4% in June, but remain up close to 10% for the year to date.

### Fixed Income

#### Quarter One 2024

Over the course of the first quarter greater caution over the likely pace and extent of rate cuts from the Federal Reserve this year affected fixed income markets. Having priced as many as six quarter-point cuts for 2024 at the peak in January, markets ended March implying around three cuts. This reflected data suggesting that the improvement in inflation stalled in the first two months of the year, contributing to a mixed quarter for government bonds. Returns on quality government bonds were positive in March, with the Bloomberg US Treasury Index and Pan-European Index gaining 0.6% and 1%, respectively. However, this only partially offset losses in the first months of the year, and the indexes delivered a negative total return for the quarter of 1% and 0.5%, respectively. March was a big month for other central banks. The Swiss National Bank kicked off the global rate-cutting cycle in March, taking investors by surprise to become the first developed-nation central bank to ease policy since the aftermath of the COVID-19 pandemic.

US and European investment grade credit also gained in March, each returning 1.2%. US and euro high yield gained 1.2% and 0.4%, respectively, in March, and have returned 1.5% and 1.6% as of the end of the first quarter.

#### Quarter Two 2024

Over the course of the second quarter the global cutting cycle continued, with the European Central Bank trimming rates for the first time since 2019. The Bank of Canada also eased policy, and the Swiss National Bank—which became the first major central bank to ease in March—cut for a second time last month.

The yield on 10-year US Treasuries moved lower, from 4.51% at the start of June to 4.40% by quarter-end. Fixed income markets were helped by further evidence that US inflation appears to be trending back to the Fed's 2% target. The tone was set by the consumer price index release around the middle of June, which showed core annual inflation at the slowest pace in three years while headline monthly prices were flat. Despite a cautious tone from the Fed, investors still became more upbeat about the potential for Fed easing this year. By the end of the month, markets were implying a 58% chance of a Fed cut at its September policy meeting, up from 42% at the start of June, based on the CME FedWatch tool. Against this backdrop, the Bloomberg US Treasury bond index made total return gains of 1%, though it has still lost 0.9% so far this year. European high-grade bonds, as measured by the Bloomberg Pan-Europe Aggregate, gained 0.6% and pared year-to-date losses to 1%. Another notable development during the month was the widening spread between the yield on German and French 10-year government bonds. This climbed to 83 basis points late in June, the highest closing level since 2012.

# Notes to the Financial Statements

## For the six months financial period ended 30 June 2024

### Note 1 Summary of material accounting policies

The material accounting policies applied in the preparation of these condensed interim unaudited financial statements are set out below.

#### (a) Basis of presentation

The condensed interim unaudited statements for the financial period ended 30 June 2024 are presented in accordance with International Accounting Standard 34, 'Interim financial reporting' ("IAS 34") and the UCITS Regulations. These financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The condensed interim unaudited financial statements should be read in conjunction with the Company's audited annual financial statements for the financial year ended ended 31 December 2023, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"), the UCITS Regulations and Irish Company Law.

The condensed interim financial statements as at 30 June 2024 are unaudited. We note that the statutory auditor's report in the audited annual financial statements as at 31 December 2023 was unqualified.

The accounting policies, accounting estimates and judgments, and methods of calculation applied in these condensed interim unaudited financial statements are consistent with those applied in the Company's annual audited financial statements for the financial year ended 31 December 2023.

#### Combined Financial Statements

- (i) For the purpose of producing the Combined Statement of Financial Position, assets and liabilities, including net assets attributable to holders of Redeemable Participating Shares of each Fund whose presentation currency is not USD are translated from its presentation currency to USD at the closing rate at the Statement of Financial Position date; and
- (ii) For the purpose of producing the Combined Statement of Comprehensive Income, the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and Combined Statement of Cash Flows, the average exchange rates for the respective six months financial period are used to convert into USD, the respective statements of the Funds with a presentation currency other than USD. The currency gain or loss on retranslation of opening net assets, and the average rate difference arising on the translation of the Combined Statement of

Comprehensive Income and the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders, is included in the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This translation adjustment does not impact the net asset value per share of any of the individual Funds.

#### Estimates and judgments policy

The preparation of the condensed unaudited interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

In preparing these condensed unaudited interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty and assumptions were the same as those applied to the preparation of the Company's audited financial statements for the financial year ended 31 December 2023.

### Note 2 Fees & Expenses

All of the fees and expenses payable in respect of a Fund are paid as one single fee. This is referred to as the Flat Fee. Out of the aforementioned Flat Fee, the Company will bear all costs incurred in connection with the Company's assets. This includes, but is not limited to, fees and expenses of the Investment Manager or Sub-Investment Manager, Depository, Administrator, Directors, Distributor or Sub-Distributor and Company Secretary. The Company may pay part or all of its fees to any person that invests in or provides services to the Company or in respect of any Fund.

The following fees and expenses will also be discharged out of the Flat Fee:

- (i) the cost of listing and maintaining a listing of Shares on any Listing Stock Exchange;
- (ii) the cost of convening and holding Directors' and Shareholders' meetings;
- (iii) professional fees and expenses for legal and other consulting services;
- (iv) the costs and expenses of preparing, printing, publishing and distributing prospectuses, supplements, annual and semi-annual reports and other documents to current and prospective Shareholders;
- (v) the costs and expenses arising from any licensing or other fees payable to any Index Provider or other licensor of intellectual property, trademarks or service marks used by the Company;
- (vi) the costs and expenses of any investment adviser appointed by the Investment Manager;

- (vii) such other costs and expenses (excluding non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Fund; and
- (viii) all establishment costs of the Company and the Funds not otherwise referred to above.

The Flat Fee does not include extraordinary costs and expenses (including but not limited to transaction charges, stamp duty or other taxes on the investments of the Company including duty charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Company's investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Fund and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Company all of which will be paid separately out of the assets of the relevant Fund). The Flat Fee is calculated and accrued daily from the Net Asset Value of each Fund and payable monthly in arrears. The Flat Fee of each Fund is as listed below and in the relevant Supplement. If a Fund's expenses exceed the Flat Fee outlined below in relation to operating the Funds, the Distributor or its affiliate will cover any shortfall from its own assets.

The Flat Fee rates which were effective since 31 December 2023 up to 30 June 2024 are outlined below:

## Note 6 Securities lending

Securities lending is the temporary transfer of securities from the lender (the Company) to a third party borrower through an appointed lending agent. In exchange for the lent security the borrower provides collateral, prior to the delivery of securities, and pays a fee over the financial period of the loan. All loans within the lending program are open and rolled daily such that they can be terminated on demand.

The Company engages in securities lending for selected, physically replicated Funds with the aim of reducing the investor's net costs. Securities lending with the Company is always overcollateralised with at least 105% margin across all asset classes. For US Treasuries a margin surplus of at least 2% is maintained such that the value of collateral held is at least 102% of the value of the lent securities. An additional safeguard is that loan balances are capped at 50% of each Fund's Asset Under Management. Funds tracking a "socially responsible" index, an ESG, Gender Equality Index or Paris aligned Indices are not in the lending program.

The following Funds are in the securities lending program as at 30 June 2024:

In general, lending may only be effected via the Securities Lending Agent (State Street Bank) with the protection of an indemnity against borrower default provided for by State Street Bank and Trust Company (State Street). Collateral is held in a depositary account that is ring-fenced from the lending agent's Balance Sheet. Mark to markets take place on a daily basis to ensure that the required margin levels are consistently maintained. Whilst State Street provides a borrower indemnity and carefully selects its underlying list of borrowers, an additional level of oversight is provided for by UBS Credit & Risk to structure a bespoke approved borrower list.

Non-cash collateral received by way of the title transfer collateral arrangements in relation to securities lending transactions cannot be sold, re-invested or pledged.

It should be noted that securities lending is subject to a certain risk where the borrower does not return the borrowed securities according to their obligation, and where the value of the collateral provided does not cover the costs of repurchase of the securities. In such cases, State Street, under the terms of the borrower default indemnity, shall cover the cost of purchasing the replacement securities, subject to certain conditions.

Currently, at least 60 percent of the gross revenue received in the context of securities lending transactions is credited to the relevant sub-fund while UBS Asset Management Switzerland AG receives approximately 20% of the gross revenues to cover the due diligence and 20% of the gross revenues are paid to the Securities Lending Agent as normal compensation for its services in the context of such efficient portfolio management techniques.

UBS Asset Management Switzerland AG receives approximately 20% of the gross revenues to cover for services performed by UBS Asset Management Switzerland AG and the Securities Lending Agent approximately 20% to cover operational costs resulting from the transactions carried out in relation to the securities lending. The services include due diligence on the borrowers (careful borrower selection and monitoring), website disclosure of daily adjusted lending data like daily publication of collateral assets, disclosure in the financial statements. In terms of collateral liquidity checks are performed and collateralization level are monitored.

All amounts in this note are stated in USD, including amounts for those Funds with a functional currency other than USD.

## Note 9 Operating segments

The Investment Manager makes the strategic resource allocations on behalf of the Funds. The Investment Manager is responsible for each Fund's entire portfolio and considers each Fund to be a single operating segment.

The Investment Manager's asset allocation decisions are based on a single, integrated investment strategy, to deliver the performance of the relevant Reference Index of each Fund, and each Fund's performance is evaluated by reference to the relevant Reference Index.

The Funds have no assets classified as non-current assets. Each Fund's investments expose it to the performance of the relevant Reference Index.

The Funds have highly diversified portfolios of investments, and no single investment accounts for a significant portion of the Company's income.

### Products and services

All of the Company's revenues are derived from one product grouping, namely the portfolio securities invested in by the Funds in order to track the performance of their respective indices.

### Geographical areas

The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each Fund's revenue may be considered as being attributed to the region stated in its investment objective.

### Major customers

As the Company is an investment company, its distinct major customers are the Authorised Participants who make the primary market for the Funds' shares. The Company permits subscriptions and redemptions solely with Authorised Participants. Investors (whether or not the ultimate beneficial owner or end-investor) may purchase and sell shares in the ETFs on exchanges or from the Authorised Participants - however, the Company does not regard such investors or related end-investors as its direct customers.

## Note 10 Fair Value Hierarchy

IFRS 13 requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels as defined under IFRS 13.

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Furthermore, for those instruments which have significant unobservable inputs (Level 3), IFRS 13, requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the financial period split between those recognised in the Condensed Statement of Comprehensive Income, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of Level 3 positions.

The Level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The majority of the Company's financial assets and liabilities measured at fair value at 30 June 2024 and 31 December 2023 were classified within Level 1 as they are active listed

equities and futures contracts, apart from forward foreign currency exchange contracts which are classified within Level 2.

Investments, whose values are based on quoted market prices in active markets, are classified within Level 1, including active listed equities. The Company does not adjust the quoted price for these instruments. The futures contracts held by the Funds as noted on the Funds Schedule of Investments as at 30 June 2024 and 31 December 2023, are classified within Level 1.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or nontransferability, which are generally based on available market information. Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently

During the financial period ended 30 June 2024, the following transfers of securities between levels took place:

- Level 3 to Level 2: one security, Contra Abiomed Inc, held on UBS Climate Aware Global Developed Equity CTB UCITS ETF, MSCI USA Socially Responsible UCITS ETF, MSCI USA UCITS ETF, MSCI World UCITS ETF, S&P 500 UCITS ETF, MSCI USA hedged to EUR UCITS ETF, MSCI USA hedged to CHF UCITS

- Level 3 to Level 2 : one security, Escrow New York REIT, held on MSCI USA Select Factor Mix UCITS ETF. The transfer in level is due to the price not being static for over 90 days.

- Level 1 to Level 3: one security, Leo Lithium Ltd, held on MSCI Pacific (ex Japan) IMI Socially Responsible UCITS ETF is valued based on the last traded market price prior to trading halt.

- Level 1 to Level 2: one security, Koninklijke DSM BV, held on MSCI EMU Climate Paris Aligned UCITS ETF, MSCI Europe Climate Paris Aligned UCITS ETF, MSCI EMU ESG Universal Low Carbon Select UCITS ETF, Global Gender Equality UCITS ETF and MSCI ACWI Socially Responsible UCITS ETF. Koninklijke DSM BV was previously delisted from trading on the Euronext Amsterdam Stock Exchange due to reorganization.

The Funds recognise transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred. The transfer is primarily due to the availability of quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs. No Level 3 reconciliation and no sensitivity analysis of assumptions used in determining the fair value have been included for these positions as they have been separately identified on the Schedule of Investments and are immaterial to the Company at the financial period ended 30 June 2024 and the financial year ended 31 December 2023. There were no other transfers of securities between the levels in the fair value hierarchy.

## Note 15 Significant events during the financial period

The war in Ukraine and the ongoing conflict in the middle east have a material impact on financial markets, first and foremost on Russian, Ukrainian and Israeli securities but also on the wider markets globally. The situation remains very volatile and the Fund Management Company is closely

monitoring in order to quickly take appropriate action to protect the interest of investors in our funds. It has put in place the necessary measures to at all times comply with applicable laws and regulations, in particular but not limited to the most recently enacted sanction regimes in the EU, Switzerland, UK and US. As we are experiencing serious trading limitations beyond sanctioned Russian securities, we are applying fair value pricing for all relevant securities where price quotes (if available) are not considered reflective of their current market value. Depending on the future evolution of financial markets there may be a further impact on investment strategies. It is unclear right now whether this will require the application of liquidity measures in certain funds. These could include all such measures as indicated in the respective fund prospectuses.

On 26 February 2024, the Central Bank approved authorisation of following Funds: MSCI Canada ESG Universal Low Carbon Select UCITS ETF and S&P 500 Climate Transition ESG UCITS ETF.

## Securities Financing Transactions Regulations

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTR") requires reporting and disclosures for securities financing transactions ("SFTs") and total return swaps. SFTs are specifically defined as per Article 3(11) of the SFTR as follows:

- a repurchase/reverse repurchase agreement
- securities or commodities lending/borrowing
- a buy-sellback or sale-buyback transaction
- a margin lending transaction

During the financial period under review, certain Funds were engaged in the Company's security lending programme, as noted in Note 6 to the financial statements. This Appendix contains the relevant SFTR reporting and disclosure requirements in respect of the securities on loan, as of 30 June 2024, on these Funds as detailed below and the relevant pages overleaf.

The following table details the value of securities on loan as a proportion of the Fund's Net Asset Value, as at 30 June 2024.
