INVESTMENT MANAGER'S REPORT

Review of H1 2024

Through the first half of 2024, bond prices have broadly weakened as inflation proved to be more persistent than had been hoped and expectations for the path of official interest rates shifted. During the first quarter investors appeared optimistic that inflation would fall to levels that would allow major central banks, including the US Federal Reserve to start reducing interest rates. However, as the first quarter came to an end this consensus changed somewhat as inflation persisted at elevated levels. This led to bond yields moving higher and an appreciation of the US dollar as investors adjusted to rates being higher for longer in the US. In other economies policymakers have already started to ease rates with the European Central Bank cutting rates for the first time in this cycle in June. The Swiss National Bank and the Bank of Canada also reduced rates in the period under review. Divergence has persisted across different economies however, with the Bank of Japan increasing rates in March for the first time since 2007.

Whilst markets have continued to speculate about the future path that inflation may take, there has also been a reasonable amount of volatility created by a number of elections that have taken place in recent months. We have seen surprise results in India as Narendra Modi's party lost its parliamentary majority whilst in South Africa the ruling ANC lost its majority for the first time since free elections were first held in 1994. Elsewhere, the Mexican presidential election was won by Claudia Sheinbaum and Mexican markets weakened as investors worried about the implications of a large victory for the Morena party. The volatility was not confined to Emerging Markets however and in France a poor showing from the mainstream parties in European elections led President Macron to trigger a snap parliamentary election. Spreads between French government bond yields and those on German debt widened sharply in response. In the United Kingdom, as the first half of the year drew to a close, investors were also preparing for a general election on July 4, 2024. In contrast to France however there was significantly less uncertainty around the outcome of this poll. Meanwhile elections are likely to continue to weigh on investors' deliberations with the US presidential election to come in November.

Against this backdrop of diverging inflation and interest rate expectations, combined with political uncertainty, nominal and real yields have increased in 2024. As a result, returns on Global and Emerging Market bond indices are typically negative for the first half of the year. Returns in US dollar terms have also been negatively impacted by the strength of the US dollar against most other currencies.

The Colchester Global Bond Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of Mexico, New Zealand, Colombia, Indonesia, Norway and Malaysia against underweights in the lower real yielding bond markets in the US, China, Japan and the Euro area. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -6.33% against a benchmark return of -3.96%. The main detractors from relative returns came from the overweight positions in the Japanese yen, Swedish krona and Norwegian krone. Returns for other classes could vary as a result of currency differentials.

The Colchester Global Bond Enhanced Currency Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of Mexico, Indonesia, New Zealand, Colombia, and Norway against underweights in the lower real yielding bond markets in the US, China, Japan, and the Euro area. For the period ended June 30, 2024, gross performance for the US dollar hedged accumulation class (Class I) was -1.42% against a benchmark return of -0.57%. The main detractors from relative returns came from the overweight position in the Japanese yen, Swedish krona and Norwegian krone whilst the underweight to core Euro bond markets and the Euro contributed to relative returns. Returns for other classes could vary as a result of currency differentials.

The Colchester Global Aggregate Bond Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of Mexico, Indonesia, Colombia and New Zealand against underweights in the lower real yielding bond markets in the US, Japan, China, and the Euro area. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -5.97% against a benchmark return of -3.16%. The largest detractors from relative returns were the overweight positions in the Japanese yen, the Swedish krona, and Norwegian krone. The underweight position in Chinese bonds was also a detractor whilst the underweight position in the Euro positively contributed to relative returns. Returns for other classes could vary as a result of exchange rate movements.

INVESTMENT MANAGER'S REPORT (Continued)

The Colchester Global Aggregate Bond Enhanced Currency Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of Mexico, New Zealand, Indonesia, Norway and Colombia against underweights in the lower real yielding bond markets in the US, UK, China and the Euro area. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -5.01% against a benchmark return of -3.16%. The main detractors from relative returns came from the overweight position to the Japanese yen, Swedish krona, Norwegian krona and the underweight position in the Chinese bond market. Returns for other classes could vary as a result of currency differentials.

The Colchester Global Green Bond Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of New Zealand, Indonesia, Singapore, and Mexico against underweights in the lower real yielding bond markets in the US, UK, and the Euro area. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -6.33% against a benchmark return of -4.76%. The main detractors from relative returns were the overweight positions in the Japanese yen, Swedish krona, and Norwegian krone. Returns for other classes could vary as a result of currency differentials.

The Colchester Global Low Duration Bond Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of Mexico, Colombia, Indonesia, New Zealand, Norway, and Malaysia against underweights in the lower real yielding bond markets in Japan, China, the US and the Eurozone. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was 2.58% against a benchmark return of -0.93%. The positions in the US, Malaysian and Polish bond markets were positive contributors to relative returns. The main detractors from relative returns came from the overweight positions in the Japanese yen, Swedish krona and Norwegian krone.

The Colchester Global Real Return Bond Fund:

At the end of June the sub-fund was overweight relative to the index in inflation-linked bond markets offering relatively higher real yields such as New Zealand, Australia, Mexico and Canada against underweight positions in the lower real yielding bond markets in the UK, US and the Euro area. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -4.47% against a benchmark return of -2.22%. The main detractors from relative returns came from the overweight position in the Japanese yen, Swedish krona and Norwegian krone. Returns for other classes could vary as a result of currency differentials.

The Colchester Local Markets Bond Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets of Mexico, Brazil, Indonesia, Colombia, South Africa, and Malaysia against underweights in the lower real yielding bond markets in China, the Czech Republic, Romania, Poland, and Thailand. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -5.05% against a benchmark return of -3.71%. The main detractors from relative returns came from the overweight position in Brazil and underweight position in China. The overweight position in the Korean won and Brazilian real also detracted from performance. Returns for other classes could vary as a result of currency differentials.

The Colchester Local Markets Real Return Bond Fund:

At the end of June the sub-fund was overweight relative to the index in the higher real yielding bond markets in Mexico, Colombia, Brazil, and South Africa against underweights in the lower real yielding bond markets in Israel and Thailand. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -10.24% against a benchmark return of -9.34%. The top three bond contributors to relative returns was the underweight position in Israel and the overweight positions in South Africa and Malaysia. The main detractors from relative returns came from overweight positions in Brazil, Colombia and Mexico whilst the underweight position in the Israeli shekel was a positive contributor to relative returns. Returns for other classes could vary as a result of currency differentials.

INVESTMENT MANAGER'S REPORT (Continued)

The Colchester Blend Local & Hard Currency Emerging Markets Bond Fund:

At the end of June the sub-fund was overweight relative to the benchmark in the higher real yielding bond markets in Brazil, Mexico, Colombia, Indonesia and South Africa against underweights in the lower real yielding bond markets in the Czech Republic, Poland, Thailand, Romania, and China. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was -3.28% against a benchmark return of -0.72%. The main detractors from relative returns came from the underweight position to US bonds and the overweight position to Brazilian real, Korean won and Philippine peso.

The Colchester Alpha Fund:

At the end of June the sub-fund was holding long positions in the higher real yielding bond markets in Mexico, Indonesia, Colombia, Norway, New Zealand, and Malaysia against short positions in the lower real yielding bond markets in the UK, US and the Eurozone. For the period ended June 30, 2024, gross performance for the US dollar unhedged class (Class I) was 0.89% against a benchmark return of 2.63%. The top three bond contributors to relative returns were the short position in the US, core Euro markets and the United Kingdom. The main detractors from relative returns came from the long positions in Japanese yen, Swedish krona and Norwegian krone. The short positions in the US bond market and core Euro markets were positive contributors to relative returns.

Outlook

Over the course of 2024 we have seen market pricing slowly move to a position where less rate cuts are expected, and they will take place over a longer time period. At the start of the year the market was expecting around six rate cuts in the US over the course of 2024, at the end of June this was more like two. The US was not the only market where expectations have moved significantly over the first half of the year either. Expected rate cuts in the UK has fallen from over six to just over one, in the Eurozone it fell from over six to around two. As we look ahead for the rest of 2024, inflation does appear to be on a gradual downward trajectory and that backdrop is likely to be supportive for fixed income assets. Nonetheless, central banks are likely to be cautious and gradual in their easing of monetary policy. The US dollar is extremely overvalued and at some point is likely to weaken. The backdrop of a weaker US dollar, were it to occur, would be a positive environment for a number of asset classes such as local currency Emerging Market debt.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

1. Organisation

The Company is an umbrella fund with segregated liability between Funds, established as an open-ended, variable capital investment company incorporated as a public limited company under the laws of Ireland. The Constitution provides for separate Funds, each representing interests in a separate and defined portfolio of assets and liabilities, which may be issued, from time to time with the approval of the Central Bank. The Company was incorporated by way of continuation of a collective investment undertaking from a prescribed jurisdiction in Ireland on June 24, 2011, and was authorised by the Central Bank pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "Central Bank UCITS Regulations") on June 24, 2011. The Company does not have, nor has it had since its incorporation, any employees.

At the date of these financial statements, eleven Funds (individually "the Fund" or "sub-fund", collectively "the Funds" or "sub-funds") have been established:

The Colchester Global Bond Fund which launched on December 3, 2012;

The Colchester Global Bond Enhanced Currency Fund which launched on July 5, 2016;

The Colchester Global Aggregate Bond Fund which launched on May 30, 2019;

The Colchester Global Aggregate Bond Enhanced Currency Fund which launched on January 12, 2021;

The Colchester Global Green Bond Fund which launched on May 30, 2019.

The Colchester Global Low Duration Bond Fund which launched on October 16, 2015;

The Colchester Global Real Return Bond Fund which launched on June 24, 2011;

The Colchester Local Markets Bond Fund which launched on March 18, 2013;

The Colchester Local Markets Real Return Bond Fund which launched on December 9, 2011;

The Colchester Blend Local & Hard Currency Emerging Markets Bond Fund which launched on January 12, 2021; and The Colchester Alpha Fund which launched on December 2, 2013.

Investment objective

The Colchester Global Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Global Bond Enhanced Currency Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Global Aggregate Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Global Aggregate Bond Enhanced Currency Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Global Green Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign debt or debt-like securities and currencies, including Green Bonds*. An associated objective is the preservation and enhancement of principal.

^{*} Bonds issued to fund projects that benefit the environment.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

1. Organisation (continued)

The Colchester Global Low Duration Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign debt or debt-like securities with shorter-dated maturities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Global Real Return Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign inflation-indexed debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Local Markets Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign developing market debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Local Markets Real Return Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign developing market inflation-indexed debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Blend Local & Hard Currency Emerging Markets Bond Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of primarily sovereign emerging market debt securities and currencies. An associated objective is the preservation and enhancement of principal.

The Colchester Alpha Fund

The Fund seeks to achieve favourable income and capital returns from a globally diversified portfolio of long and short positions in primarily sovereign debt and other debt or debt-like securities and currencies. An associated objective is the preservation and enhancement of principal.

Manager

Colchester Global Investors (Dublin) Management Limited is the Manager of the Company. The Manager is authorised and regulated by the Central Bank of Ireland to act as a UCITS management company and to carry on the business of providing management and related administration services to UCITS collective investment schemes.

The management agreement between the Company and the Manager provides that the Manager shall be responsible for the general management, investment management, distribution and administration of the Company's affairs. The Manager is empowered to delegate one or more of its functions under the management agreement, subject to the overall supervision and control of the Company.

Investment Manager

The Manager has appointed Colchester Global Investors Limited as the Investment Manager in respect of each Fund. The Investment Manager is authorised and regulated by the Financial Conduct Authority, and is registered as an investment adviser with the US Securities and Exchange Commission. The Investment Manager was established in 1999.

The investment management agreement between the Company and the Investment Manager provides that the Investment Manager shall be responsible for the investment and reinvestment of the Funds' assets. The management agreement shall continue in force until terminated immediately at any time by the Company or by the Manager on not less than 90 days' notice in writing.

The Investment Manager has appointed Colchester Global Investors (Singapore) Pte. Ltd as a Sub-Investment Manager of the Funds. Colchester Global Investors (Singapore) Pte. Ltd holds a Capital Markets Services License in fund management issued by the Monetary Authority of Singapore pursuant to the Securities and Futures Act Chapter 289 of Singapore.

Administrator

Northern Trust International Fund Administration Services (Ireland) Limited, has been appointed by the Company pursuant to the administration agreement to act as the Company's administrator. The Administrator performs certain administrative duties for the Company and provides certain regulatory, recordkeeping and accounting services to the Company. The Administrator is wholly owned by the Northern Trust Corporation.

1. Organisation (continued)

Depositary

Northern Trust Fiduciary Services (Ireland) Limited, has been appointed as depositary of the Company pursuant to the depositary agreement. The Depositary is a private limited liability company incorporated in Ireland on July 5, 1990. Its main activity is the provision of custodial services to collective investment schemes. The Depositary is wholly owned by the Northern Trust Corporation.

2. Significant accounting policies

The Company's financial statements have been prepared in conformity with US GAAP and in accordance with applicable sections of the Accounting Standards Codification ("ASC") of the Financial Accounting Standards Board ("FASB").

Standards and amendments to existing standards effective June 30, 2024

There are no new standards or interpretations or amendments to existing standards that are not yet effective or that would be expected to have a significant impact on the Company.

The significant accounting policies are as follows:

(a) Security valuation

The Funds invest in sovereign marketable global fixed income securities, including inflation-indexed securities. In determining the value of the assets of each Fund, each investment listed, traded or dealt on a stock exchange or regulated market ("Regulated Market") for which market quotations are readily available shall be valued at the last traded price as at the Valuation Point in the relevant Regulated Market on the relevant Dealing Day, provided that the value of the investment listed, traded or dealt on a Regulated Market but acquired or traded at a premium or at a discount, outside or off the relevant stock exchange, may be valued, taking into account the level of premium or discount as at the date of valuation of the investment and the Depositary must ensure that the adoption of such procedure is justifiable in the context of establishing the probable realisation value of the security.

If the investment is normally listed, traded or dealt on or under the rules of more than one Regulated Market, the relevant Regulated Market shall be that which constitutes the main market for the investment. If prices for an investment listed, traded or dealt in on the relevant Regulated Market are not available at the relevant time or are unrepresentative, or in the event that any investments are not listed or traded on any Regulated Market, such investment shall be valued at such value as shall be certified with care and good faith as the probable realisation value of the investment by a competent professional person appointed by the Directors and approved for such purpose by the Depositary, which may be the Manager.

For index linked securities, the coupon interest rate for each security remains fixed for the term of the security, and quarterly or semi-annual coupon payments are based on the inflation-adjusted principal at the time the interest falls due for payment. The principal amount of the security is adjusted for inflation on a periodic basis by applying the relevant consumer price index factor for the security. The Company's policy is to record the adjustment to the principal value of each bond as interest income.

The adoption of the policy has no impact on the total net assets of the Funds since the securities are recorded at fair value, as described in Note 13. However, it does result in periodic reclassifications from realised and change in unrealised gains/losses to interest income. At maturity, the securities will typically be redeemed at the greater of their inflation-adjusted principal, or the par value at original issue. The adjustments arising from the inflation restatement of principal are reflected in the Statement of Operations, the Statement of Changes in Net Assets and the Financial Highlights.

All other securities and assets, including those for which reliable quotations or pricing services are not readily available will be valued by the relevant Investment Manager or Investment Sub-Manager at probable realisation value which must be estimated with care and in good faith.

All other securities are recorded at fair value. Such securities are valued on the basis of quotations from the primary market in which they are traded. Securities traded only on over-the-counter markets for which reliable quotations are available are valued at the mid point. Securities traded on generally recognised securities exchanges are valued at their closing price, or if there are no sales, at the mid point.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

2. Significant accounting policies (continued)

(b) Investment activity

Investment transactions are accounted for on the date the securities are purchased or sold (the trade date). Realised gains or losses on investments sold are computed on an average cost basis and are net of transaction costs. Transaction costs like fees and commission paid to agents, advisers, brokers and dealers are identifiable but transaction costs on acquisition and disposal of investments are not separately identifiable.

(c) Income recognition

Interest income is recognised on an accrual basis adjusted using the effective interest method for securities purchased at a premium or discount to par value.

(d) Forward foreign currency contracts

The Funds may enter into forward foreign currency contracts as a way of managing foreign exchange rate risk on investments or for efficient portfolio management. The Funds may enter into these contracts to hedge against changes in currency exchange rates. The forward foreign currency exchange contracts are used to hedge the currency exposure on individual positions taken by the Funds and to hedge certain non base currency shares.

Each contract is marked-to-market on the valuation date at the applicable foreign exchange rate, and the change in market value is recorded by the Funds as an unrealised gain or loss. Realised gains or losses are recorded upon settlement of the forward foreign currency contract. The realised/unrealised gain or loss is equal to the difference between the value of the contract at the outset and the value of the contract at settlement date/financial year end date and are included in the Statement of Operations. Risks may arise upon entering these contracts from the potential inability of the counterparty to meet the terms of their contracts.

(e) Futures contracts

Futures contracts are valued at the last reported settlement or closing price as supplied by the exchange on which the contracts are traded. Cost of contracts, which include both the cost to acquire the contract plus any commissions, are determined on the first in first out basis. Futures contracts are recorded on a trade date basis. Gains or losses from futures contracts are considered realised for accounting purposes on the trade date of the transaction closing or expiration of the open position. Realised gains or losses are included in the Statement of Operations. Unrealised gains are reported as an asset and unrealised losses are reported as a liability in the Statement of Assets and Liabilities. When the contract is closed, the Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Unrealised gains or losses on open futures contracts are calculated as the difference between the contract price at trade date and the contracts closing price on the valuation date as reported on the exchange on which futures contracts are traded.

(f) Foreign currency translation

The functional and presentation currency is United States dollars. The Directors consider the functional currency of the sub-funds as the currency most faithfully representing the economic effects of the underlying tranactions, events, and conditions of the sub-funds. Investment securities and other assets and liabilities denominated in foreign currencies are translated into United States dollars at exchange rates prevailing at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into United States dollars at the exchange rates prevailing at the dates of the transactions. Translation gains and losses pertaining to investment transactions are included in realised and change in unrealised gains and losses in the Statement of Operations.

(g) Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Colchester closely watched events in Ukraine and noted the impacted liquidity on the non-sanctioned Russian government bonds held by Colchester's Funds. Colchester's Valuation Committee met regularly throughout the crisis. The Committee fair valued bonds where appropriate, initially due to pricing providers ceasing to value Russian Ruble denominated government bonds. Given the dysfunctional market, Colchester looked for opportunities to divest and was able to take advantage of selling bonds held in Euroclear, free of payment, settling in USD, when that became an available option. A small number of Colchester's approved counterparties were able to settle a divestment trade by this method which required certain attestations from Colchester.

2. Significant accounting policies (continued)

(g) Use of estimates (continued)

Colchester's Financial Crime and Legal team checked the required attestations relating to the settlement of Russian divestment trades and, where satisfied, were able to sign the attestation. When opportunities became available for Colchester to divest at an appropriate price, the opportunity was taken, where possible. For large periods of post-invasion 2022, external pricing was either not available or not indicative of the dysfunctional, illiquid market. For that reason the fair valuation approach has been taken since February 28, 2022 and pricing has only been changed when there has been any reliable evidence of trading having occurred (Colchester's executions).

(h) Financial instruments

The fair value of the Funds' assets and liabilities which qualify as financial instruments under the FASB ASC 825, Disclosures about Fair Value of Financial Instruments ("ASC 825"), approximates the carrying amount presented in the Statement of Assets and Liabilities.

(i) Cash and cash equivalents

Cash and cash equivalents include cash in hand and deposits held at call with banks.

(i) Margin cash

Margin cash includes cash due to or from brokers for open futures contracts (represented by the exchange traded futures contracts margin deposits held with brokers), cash pledged as collateral with brokers and cash received as collateral from counterparties for derivative trading and repurchase agreements.

(k) Derivative instruments disclosure

FASB ASC 815 *Disclosures about Derivative Instruments and Hedging Activities* ("ASC 815") defines the disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about how and why an entity uses derivative instruments and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. These disclosures are presented in Note 8.

(l) Offsetting Financial Assets and Liabilities

FASB ASU No. 2011-11 Disclosures about Offsetting Assets and Liabilities ("ASU No. 2011-11") requires entities to disclose quantitative information about the effect of netting on financial instruments and derivative instruments that are either offset on the Statement of Assets and Liabilities or subject to an enforceable master netting arrangement or similar agreement by providing both net and gross information for these assets and liabilities.

The Funds enter into derivative transactions under International Swaps and Derivatives Association (ISDA) master netting agreements.

In general, under ISDA master netting agreements the amounts owed by each counterparty on a single day in respect of all transactions outstanding in the same currency are aggregated into a single net amount that is payable by one party to the other. In certain circumstances – e.g. when a credit event such as a default occurs, all outstanding transactions under the agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions. In accordance with FASB ASU No. 2011-11, tables setting out the carrying amounts of recognised financial instruments that are subject to the above agreement are presented in Note 8 of the financial statements for each Fund. For financial reporting purposes, the Funds do not offset financial assets and liabilities that are subject to master netting arrangements or similar agreements on the Statement of Assets and Liabilities.

(m) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs, when incurred, are immediately recognised in profit or loss as an expense. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

2. Significant accounting policies (continued)

(n) Distributions

Proposed distributions to holders of redeemable participating shares are recognised in the statement of comprehensive income when they are appropriately authorised and no longer at the discretion of the fund. Distributions are classified as finance costs in the statements of comprehensive income.

(o) Recognition/de recognition

Financial assets and financial liabilities are recognised on the trade date – the date on which the Company commits to purchase or sell the financial asset or financial liability.

A financial asset is de recognised where:

- the rights to receive cash flows from the asset have expired or;
- the Company has transferred its rights to receive cash flows from the assets or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement and;
- either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has
 neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the
 asset.
- When the Company has transferred its rights to receive cash flows from an asset (or has entered into a pass-through arrangement), and has neither transferred substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset.

The Company de recognises a financial liability when the obligation under the liability is discharged, cancelled or expired.

(p) Operating Expenses

The Sub-Funds bear all normal operating expenses including stamp and other duties and charges incurred on the acquisition and realisation of investments. Operating expenses are recognised on an accruals basis.

(q) Collateral

The policy that will be applied to collateral arising from OTC derivative transactions relating to the Funds is to adhere to the requirements set out in Schedule III as outlined in the Prospectus. This sets out the permitted types of collateral, the level of collateral required and the haircut policy and, in the case of cash collateral, the re-investment policy prescribed by the Central Bank pursuant to the UCITS Regulations. The categories of collateral which may be received by the Funds include cash and sovereign bonds.

From time to time and subject to the requirements in Schedule III, the policy on levels of collateral required and haircuts may be adjusted, at the discretion of the Investment Manager, where this is determined to be appropriate in the context of the specific counterparty, the characteristics of the asset received as collateral, market conditions or other circumstances. The level of collateral required will be at least that which is necessary to ensure that the risk exposure to a counterparty does not exceed the limits set out in Regulation 70(1)(c) of the UCITS Regulations (i.e., the difference between the risk exposure to the counterparty and the limits set out in Regulation 70(1)(c) of the UCITS Regulations). The haircuts applied (if any) by the Investment Manager are adapted for each class of assets received as collateral, taking into account the characteristics of the assets such as the credit standing and/or the price volatility, as well as the outcome of any stress tests performed in accordance with the requirements in Schedule III. Each decision to apply a specific haircut, or to refrain from applying any haircut, to a certain class of assets should be justified on the basis of this policy.

If cash collateral received by a Fund is re-invested, the Fund is exposed to the risk of loss on that investment. Should such a loss occur, the value of the collateral will be reduced and the Fund will have less protection if the counterparty defaults. The risks associated with the re-investment of cash collateral are substantially the same as the risks which apply to the other investments of the Fund. For further details see the section entitled "Risk Factors".

Cash collateral received by a Sub-Fund is identified in the Statement of Assets and Liabilities as margin cash and is included as a component of cash and cash equivalents. Cash collateral is measured at amortised cost.

3. Cash and cash equivalents

All cash balances (including margin cash and foreign cash balances) are held in segregated accounts with Northern Trust Company, which the Depositary has appointed as its global depositary, with the exception of the margin cash balance of The Colchester Alpha Fund, which is held with Citigroup Global Markets Ltd. The Company continuously monitors the credit standing of its banker and does not expect any material losses as a result of this concentration.

4. Related persons transactions

The Manager receives a management fee (the "Management Fee") out of the assets of the Funds on a monthly basis. The Management Fee is calculated and accrued by the Administrator as of each Dealing Day, at the following annual rates set out in respect of the specific fee Class of a Fund below.

]	R Premier

Transactions with connected persons

Any transaction carried out with a company by a management company or depositary to the company, the delegates or sub-delegates of the management company or depositary, and any associated Company of such a management company, depositary, delegate or sub-delegate ("Connected Persons") must be carried out as if conducted at arm's length. Transactions must be in the best interests of the shareholders. Connected persons are related parties to the company.

Directors' and secretary's interests in shares and contracts

At June 30, 2024, Keith Lloyd held 10,892 (2023: 10,892) GBP Hedged Accumulation Class – Z Shares (GGHY) of The Colchester Global Bond Fund, 31,849 (2023: 31,849) USD Unhedged Accumulation Class – Z Shares (LUUY) of The Colchester Local Markets Bond Fund and through Keith Lloyd Family Trust, 27,842 (2023: 27,842) USD Unhedged Accumulation – Z Shares (AUUY) of The Colchester Global Alpha Fund and 102,343 (2023: 101,960) USD Unhedged Accumulation – I Shares (MUUA) of The Colchester Blend Local & Hard Currency Emerging Markets Bond Fund.

At June 30, 2024, Cian O'Brien held 3,893 (2023: 3,875) EUR Hedged Accumulation Class – I Shares (GEHA) of The Colchester Global Bond Fund, 5,983 (2023: 5,983) EUR Unhedged Accumulation Class – Z Shares (LEUY) of The Colchester Local Markets Bond Fund, and 7,780 (2023: 7,751) USD Unhedged Accumulation – I Shares (MUUA) of The Colchester Blend Local & Hard Currency Emerging Markets Bond Fund.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

4. Related persons transactions (continued)

Directors' and secretary's interests in shares and contracts (continued)

None of the other Directors, the company secretary or their families had any beneficial interests in the share capital of the Company at June 30, 2024 or during the financial period (2023: same). No other Directors or the company secretary had, at any time during the financial year, a material interest in any contract of significance, subsisting during or at the end of the financial period, in relation to the business of the Company (2023: same).

The Directors shall be entitled to be paid a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. Such fees shall be discharged by the Manager. The Directors will be entitled to be reimbursed by the Manager on behalf of each of the Funds for all reasonable disbursements and out-of-pocket expenses incurred by them.

For the financial period ended June 30, 2024, annual fees payable to the Irish Directors amounted to €60,000 (2023: €60,000). Keith Lloyd, Cian O'Brian and Michele Connell have or had no entitlement to receive fees for their services as Directors of the Company as they serve or served as directors or officers of the Investment Manager.

5. Transaction costs

There were no transaction costs incurred during the financial period ended June 30, 2024 (2023: none). Transaction costs like fees and commission paid to agents, advisers, brokers and dealers are identifiable but transaction costs on acquisition and disposal of investments are not separately identifiable.

Research costs were applied from January 1, 2018 and replaced previous arrangements whereby research costs were bundled in the prices paid for investments. All research costs incurred during the financial period were borne by the Manager (2023: same).

6. Capital

The share capital of the Company shall at all times equal the Net Asset Value of the Company. The net issued share capital shall not be more than the currency equivalent of EUR 500 billion divided into an unspecified number of shares of no par value in the Company at the Net Asset Value per Share. There are no rights of pre-emption upon the issue of Shares in the Company. The Company has issued share capital in excess of EUR 300,000. The Company reserves the right to issue Subscriber Shares at any time in order to ensure the Company at all times has a minimum issued share capital to the value of EUR 300,000. Subscriber Shares entitle the Shareholders holding them to attend and vote at all meetings of the Company but do not entitle the holders to participate in the dividends or net assets of any Fund or of the Company.

Each of the Shares entitles the Shareholder to participate equally on a pro rata basis in the dividends (if any) and net assets of a Fund attributable to the relevant Class in respect of which they are issued. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon. The Company currently has one subscriber share in issue which is held by Colchester Global Investors Limited.

The proceeds from the issue of Shares shall be applied in the books of the Company to the relevant Fund and shall be used in the acquisition on behalf of the relevant Fund of assets in which the Fund may invest. The records and accounts of each Fund shall be maintained separately.

The Directors reserve the right to redesignate any Class from time to time, provided that Shareholders in that Class shall first have been notified by the Company that the Shares will be redesignated and shall have been given the opportunity to have their Shares redeemed by the Company, except that this requirement shall not apply where the Directors redesignate Shares in issue in order to facilitate the creation of an additional Class.

Each of the Shares entitles the holder to attend and vote at meetings of the Company and of the Fund represented by those Shares. No Class confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other Class or any voting rights in relation to matters relating solely to any other Class. Any resolution to alter the Class rights of the Shares requires the approval of three quarters of the holders of the Shares represented or present and voting at a general meeting duly convened in accordance with the Constitution.

The Constitution empowers the Directors to issue fractional Shares in the Company. Fractional Shares may be issued and shall not carry any voting rights at general meetings of the Company or of any Fund or Class and the Net Asset Value of any fractional Share shall be the Net Asset Value per Share adjusted in proportion to the fraction. When issuing Shares, the number of Shares issued will be rounded to three decimal places and any surplus amounts will be retained for the benefit of the relevant Fund.

A number of Classes of Shares are available in respect of the Funds including currency classes, unhedged and hedged classes, accumulation and distribution classes. None of the Share Classes of the Funds are listed.

All Shares belong to one of the following fee Classes: Z Shares (available to invest in by employees of the Investment Manager or its affiliates that invest directly or through certain intermediaries, and Professional Investors who may be required to enter into a suitable agreement with the Investment Manager or Sub-Investment Manager at the discretion of the Board of Directors), I Shares and R Shares (available to invest in by Professional Investors and also by all categories of investor when investing via a professional intermediary) and A Shares and B Shares (available to invest in by all categories of investor but must be invested in via a professional intermediary).

All Share Classes are denominated in the following currencies: Australian dollar, Canadian dollar, Swiss francs, Danish krone, euro, pound sterling, Hong Kong dollar, Japanese yen, Norwegian krone, New Zealand dollar, Swedish krona, Singapore dollar, US dollar, and South African rand. For each currency there is a hedged accumulation share class, an unhedged accumulation share class, a hedged distribution share class and an unhedged distribution share class.

Investors must demonstrate to the satisfaction of the Company that they are eligible to buy the Shares they are applying to purchase by providing the Company and the Administrator with sufficient evidence of their status. Investors indemnify the Company and its delegates against any losses, costs or expenses that the Company or its delegates may incur by acting in good faith upon any declarations made or purporting to be made upon application.

The Company may, at its discretion, delay the acceptance of any subscription (including by way of switch or transfer) for Shares until such date as it has received sufficient evidence on the qualification of the investor as being eligible to invest in those Shares. If it determines at any time that a holder of Shares is not eligible to hold those Shares, the Company may either redeem the relevant Shares in accordance with the Prospectus, or convert such Shares into Shares of a Class which the investor is eligible to hold.

7. Soft commission arrangements

There were no soft commission arrangements affecting the Company during the financial period (2023: Nil).

8. Financial risk disclosures

Market and credit risk

Market risk is the possibility that future changes in market prices may make a financial instrument less valuable. The Funds' exposure to market risk may be due to many factors, including the movements in interest rates, foreign exchange rates, and market volatility underlying these instruments. The Funds invest on a global basis in both developed and developing markets. In doing so, the Funds are subject to: (i) currency exchange-rate risk; (ii) the possible imposition of withholding, income or excise taxes; (iii) the absence of uniform accounting, auditing and financial reporting standards, practices and disclosure requirements and little or potentially biased government supervision and regulation; (iv) financial, economic and political risks, including expropriation, currency exchange control and potential restrictions on foreign investment and repatriation of capital; and (v) global market turmoil. Credit ratings applied to debt securities are not absolute measures of credit quality and do not reflect all potential market risks. Ratings agencies may fail to reflect changes in an issuer's underlying financial condition in a timely manner. The Investment Manager does not rely solely on credit ratings, and develops its own analysis of the credit quality of debt issuers. By focusing on a relatively small number of sovereign markets, the Investment Manager identifies country bond markets with low credit risk that possess investment value rather than on the contribution from the credit risk component of different issuers. Diversification of risk is achieved by ensuring an adequate spread of investments and the use of limits on the maximum size of investments appropriate in each country taking into account its financial market, infrastructure, economic conditions, liquidity and other factors. The credit risk component of risk is controlled via the country allocation process by restricting total exposure to lower rated countries.

Another source of credit risk arises due to the assets under custodial (and sub-custodial) arrangements and the other areas where there are credit exposures can be summarised into cash and net foreign exchange mark to market exposures. As securities are settled delivery-against-payment, there is little counterparty risk on these transactions.

As described above in the normal course of business, the Funds enter into forward foreign currency contracts, futures contracts and interest rate swaps which may result in "off-balance-sheet" market and credit risks, the amounts of which are not apparent from the Statement of Assets and Liabilities. To mitigate the credit risk of cash, low cash balances are maintained generally although cash balances may increase to meet redemption requests and/or the settlement of forward foreign currency contracts.

The principal credit risk is counterparty default (i.e., failure by the counterparty to perform as specified in the contract) due to financial impairment or other reasons. Credit risk is reduced by dealing with reputable counterparties and obtaining collateral that may be used to offset losses. Credit risk is generally higher when a non-exchange-traded financial instrument is involved because the counterparty for exchange-traded financial instruments is the exchange's clearing house, which is backed by the membership of the exchange. When the Funds enter into forward foreign currency contracts, futures contracts and interest rate swaps the Funds are exposed to credit risk arising from the potential inability of counterparties to perform under the terms and obligations of the contracts. All forward foreign exchange contracts, futures contracts and interest rate swaps utilise the Northern Trust Company, BNP Paribas, Citibank. JP Morgan Chase and UBS respectively as their counterparty. The Northern Trust Company, BNP Paribas, Citibank. JP Morgan Chase and UBS respectively is the counterparty for the collateral balances pledged and received in respect of the forward foreign currency contracts. Citibank is the counterparty for the margin cash balance pledged by the Colchester Alpha Fund in respect of the futures contracts.

Credit risk statement

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Northern Trust Fiduciary Services (Ireland) Limited is the appointed depositary of the Company, responsible for the safe-keeping of assets. The Depositary has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both Depositary and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at financial period ended June 30, 2024, NTC had a long term credit rating from Standard & Poor's of A+ (2023: A+).

TNTC (as global sub-custodian of the Depositary) does not appoint external sub-custodians within the U.S., the U.K., Ireland, Canada, Belgium, France, Germany, Netherlands and Saudi Arabia. However, in all other markets, TNTC appoints local external sub-custodians.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

8. Financial risk disclosures (continued)

Credit risk statement (continued)

The Depositary, in the discharge of its depositary duties, verifies the Funds' ownership of Other Assets, (as defined under Other Assets, Art 22(5) of UCITS V Directive 2014/91/EU), by assessing whether the Funds hold the ownership based on information or documents provided by the Fund or where available, on external evidence. There are counterparty checks completed on all Funds that are holding assets with them. In the case of UCITS funds there are defined limits that cannot be breached.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Fund, clearly identifiable as belonging to the Funds, and distinct and separately from the proprietary assets of TNTC, the Depositary and NTC.

Where relevant please note the following currencies, Jordanian Dinar, Saudi Riyal, cash in the onshore China market (principally the currency of Chinese Yuan Renminbi, and any other currencies remitted into accounts in the onshore China market), are no longer held on the Balance Sheet of TNTC. For these off-book currencies, clients' cash exposure is directly to the relevant local sub-custodian / financial institution in the market.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Funds' rights with respect to its assets to be delayed.

The Responsible Party* manages risk by monitoring the credit quality and financial position of the Depositary and such risk is further managed by the Depositary monitoring the credit quality and financial positions of sub-custodian appointments.

* The Board of Directors or its delegate(s).

Liquidity risk

Liquidity risk is the risk that the Funds will encounter difficulties in meeting obligations associated with its financial liabilities. Liquidity risk to the Funds arises from the redemption requests of investors and the liquidity of the underlying investments held by the Funds. If redemption requests on any Dealing Day exceed 10% of the total number of Shares in a Fund, the Company may defer the excess redemption requests to subsequent Dealing Days and shall redeem such Shares rateably. Diversification of risk is achieved by ensuring an adequate spread of investments and the use of limits on the maximum size of investments appropriate in each country taking into account its financial market, infrastructure, economic conditions, liquidity and other factors. The Investment Manager monitors its concentration limits closely to ensure continued liquidity and an absence of large exposure risk is achieved.

Foreign currency risk

The Funds may invest in securities denominated in currencies other than its reporting currency. Consequently, the Funds are exposed to risks that the exchange rate of the reporting currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Fund's assets which are denominated in currencies other than its own currency.

The Investment Manager monitors the exposure on foreign currency denominated assets and liabilities and, where considered appropriate, uses forward foreign currency contracts to manage foreign currency risk.

Forward foreign currency contracts (including non-deliverable forward foreign exchange transactions) may be used to reduce the risk of adverse market changes in exchange rates or to increase exposure to foreign currencies or to shift exposure in order to address foreign currency fluctuations between currencies. The Manager uses the "commitment approach" to calculate the global exposure of all Funds with the exception of The Colchester Alpha Fund. The commitment approach converts the Financial Derivative Instruments ("FDI") positions into the equivalent positions of the underlying assets, and seeks to ensure that the risk associated with the use of FDI is monitored in terms of any future commitments to which it is (or may be) obligated. The FDI transactions are valued daily and can be closed out at fair value at any time at the request of the Manager on behalf of the Funds.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

8. Financial risk disclosures (continued)

Foreign currency risk (continued)

The Colchester Alpha Fund seeks to establish long and short positions that will benefit from the difference in some currencies relative to others. This Fund may manage currency risk through the use of spot and forward currency contracts, both deliverable and non-deliverable.

The Colchester Alpha Fund may also use interest rate swaps, forward foreign exchange contracts (including currency forwards and non-deliverable currency forwards) and bond futures in establishing its long and short positions. Interest rate swaps or futures may be a more efficient means than a bond to create a short or "pay" fixed rate, position and may also provide greater flexibility in the management of portfolio duration. The Colchester Alpha Fund uses a Value at Risk approach to measure global exposure. In accordance with the requirements of the Central Bank, the Fund will be managed subject to maximum Absolute VaR of 20% of NAV (99% confidence level & 20 day holding period). The Colchester Alpha Fund employs leverage. In this context, "leverage" is calculated, in accordance with the requirements of the Central Bank, as the sum of the notionals of the derivatives used. The following table discloses information on the Fund's Value at Risk approach in accordance with the requirements of the Central Bank.

As at June 30, 2024

			VaR	VaR	VaR
Type	Index Exposure	Leverage	Minimum	Maximum	Average
Absolute VaR	n/a	210.5%	1.6%	1.8%	1.8%

Comparative as at December 31, 2023

			VaR	VaR	VaR
Type	Index Exposure	Leverage	Minimum	Maximum	Average
Absolute VaR	n/a	211.9%	1.4%	2.5%	1.7%

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

8. Financial risk disclosures (continued)

Foreign currency risk (continued)

The disclosed level of leverage is not intended to be an additional risk exposure limit for the Fund. Furthermore, it is not intended that the leverage level by itself be indicative of the risk profile of the Fund. Leverage is just one of many risk factors considered in constructing the Fund's portfolio.

At June 30, 2024, the Funds had unsettled forward foreign currency contracts for each class of share as detailed on the following page. The counterparty to all forward foreign currency contracts was one of BNP Paribas, Citigroup, HSBC, JP Morgan Chase, Northern Trust and UBS.

Foreign currency risk (continued)

The Funds transact in derivative instruments including forward foreign currency contracts primarily for trading purposes with each instrument's primary risk exposure being interest rate, credit, foreign exchange or commodity risk. The fair value of these derivative instruments is included as a separate line item in the Statement of Assets and Liabilities with changes in fair value reflected as realised gains/losses or net change in unrealised gains/losses on derivatives within the Statement of Operations.

The total notional or contractual amounts and fair values of derivative instruments by contract type have been appropriately disclosed above. The counterparty for all forward foreign currency contracts was one of BNP Paribas, Citigroup, JP Morgan, Northern Trust and UBS.

The following table indicates the gains and losses on derivatives, by contract type, as included in the Statement of Operations for the financial period ended June 30, 2024.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

FOR THE FINANCIAL PERIOD ENDED JUNE 30, 2024 (expressed in United States dollars)

9. Taxation

Under current Irish law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended (the "TCA"). On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise if a "chargeable event" occurs. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation, transfer or deemed disposal of shares for Irish tax purposes, arising as a result of holding shares in the Company for a period of eight years or more, or the appropriation or cancellation of shares of a shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (i) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided that a relevant declaration is in place (in accordance with Schedule 2b of the TCA) and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct; or
- (ii) a shareholder who is an exempt Irish investor (as defined in Section 739D TCA).

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and recovery of such taxes by the Company or its shareholders is subject to the applicable tax treaty of such country.

The Company has adopted the authoritative guidance on accounting for and disclosure of uncertainty in tax positions, which requires the Directors to determine whether a tax position of the Company is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. For tax positions meeting the more likely than not threshold, the tax amount recognised in the financial statements is reduced by the largest benefit that has a greater than 50% likelihood of being realised upon ultimate settlement with the relevant taxing authority.

The Directors have analysed the Company's tax position and have concluded that no liability for unrecognised tax benefits should be recorded in these financial statements.

ASC 740 Accounting for Uncertainty in Income Taxes ("ASC 740") established financial accounting and disclosure requirements for recognition and measurement of tax positions taken or expected to be taken on a tax return. The Directors have reviewed the Company's tax positions for all open tax years (the current and prior four tax years) and have concluded that no material provision for income tax is required in the Company's financial statements. Such open tax years remain subject to examination by tax authorities.

10. Indemnifications and warranties

In the normal course of its business, the Company has entered into contracts or agreements that provide a variety of indemnifications. Any exposure to the Funds under these arrangements would involve future claims that may be made against a Fund. The Funds' maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur and the Funds expect the risk of loss to be remote (2023: same).

11. Financial highlights

The financial highlights tables on the following pages are intended to facilitate the understanding of the Funds' financial performance during 2024 and 2023.

The per share operating performance and ratios below are computed based upon the weighted average number of shares outstanding and the weighted average net assets, respectively, for the financial period ended June 30, 2024.

13. Fair value measurements

With the exception of some forward currency contracts and future contracts, all the assets owned by the Sub-Funds are publicly traded debt obligations of governments, their agencies and supranationals or exchange traded derivatives. The Funds do not normally invest in securities without a readily obtainable market value. Information on a significant majority of the debt obligations is readily available through market information service providers such as Bloomberg. The accounting records for the Fund are maintained by the Administrator and Depositary (collectively "Northern Trust"). In its capacity as fund administrator, Northern Trust is responsible for valuing the assets of each Sub-Fund in accordance with the Northern Trust Pricing Guidelines, as amended from time to time. All financial instruments are recorded on a fair value basis.

The financial instruments within each Fund are classified according to the fair value hierarchy of ASC 820 Fair Value Measurements issued Accounting Standards Codification of the Financial Accounting Standards Board ("ASC 820"). The ASC 820 measures fair value on a hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

The three levels of the fair value hierarchy under ASC 820 are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active; and
- Level 3 Inputs that are unobservable.

13. Fair value measurements (continued)

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Board of Directors and Northern Trust. Northern Trust considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to Northern Trust's perceived risk of that instrument.

Investments with values that are based on quoted market prices in active markets are classified within level 1. These include active listed equities, certain sovereign obligations, and certain money market securities. Northern Trust does not adjust the quoted price for such instruments, even in situations where a Sub-Fund holds a large position and a sale could reasonably impact the quoted price. Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Bonds issued by G8 countries and exchange-traded derivatives, such as futures contracts, are typically classified within level 1 or level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded. OTC derivatives, including forward foreign currency contracts, are valued by using observable inputs, such as quotations received from the counterparty, dealers or brokers, whenever available and considered reliable. Such inputs include market prices for reference securities, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. Certain OTC derivatives, such as forward foreign currency contracts (both deliverable and non-deliverable), have inputs which can generally be corroborated by market data and are therefore classified within level

Details on the valuation approach taken to value the assets held by the Sub-Funds, including the approach for any assets categorised as level 2 and so classified as 'hard to value', are set out in Northern Trust's Pricing Guidelines.

The following tables present the financial instruments carried on the Statement of Assets and Liabilities by caption and by level within the valuation hierarchy as at June 30, 2024.

Assets and liabilities not measured at fair value

There were no transfers between levels for the financial period ended June 30, 2024 and year ended December 31, 2023.

14. Efficient portfolio management

In accordance with paragraph 7(d) Schedule 7, the Central Bank UCITS Regulations require disclosure to be included in the annual reports for the Company regarding revenues arising from efficient portfolio management techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

The Central Bank has stated that a reasonable interpretation of the reference to "revenue" in paragraph 7(d) Schedule 7, subject to any clarification which may be provided by ESMA, would be that it is applicable only to revenue from securities lending arrangements and repurchase/reverse repurchase agreements.

As the Company does not engage in securities lending arrangements or the use of repurchase/reverse repurchase agreements, no details of revenues arising from efficient portfolio management techniques are included in this note.

17. Significant events during the financial period

On March 14, 2024, the Fund changed its company secretary from Bradwell Limited to Colchester Global Investors (Dublin) Management.

On June 7, 2024, EUR Unhedged Accumulation Class – R Shares (LEUB) was launched on The Colchester Local Markets Bond Fund.

There were no other significant events during the financial period.

18. Significant events after the reporting date

On July 24, 2024, the prospectus was updated to include the newly launched sub-fund - The Colchester Global Green Bond Enhanced Currency Fund (PKHY), ISIN: IE000JYSW0A1. The Fund is designed to invest into 100% of fixed income securities in Green Bonds and follows a long/short currency strategy. The Colchester Global Green Bond Enhanced Currency Fund (PKHY) has been classified as an SFDR Article 9 product, and further information on sustainability matters of the fund can be found in the SFDR Disclosures.

18. Significant events after the reporting date (continued)

Additionally, the Colchester Global Green Bond Fund was reclassified as an Article 9 Product, and the minimum investment in Green Bonds was raised from 70% of the NAV, to 100% of all fixed income securities.

On July 24, 2024, EUR Unhedged Accumulation Class – A Shares (LEUD) was launched on The Colchester Local Markets Bond Fund.

On July 24, 2024, EUR Unhedged Accumulation Class – A Shares (GEUD) was launched on The Colchester Global Bond Fund.

On 12 August 2024, SEK Unhedged Accumulation Class – I Shares (LRUA) was launched on The Colchester Local Markets Bond Fund.

There were no significant events after the reporting date.

19. Approval of financial statements

The financial statements were approved and available for issue on August 27, 2024.

APPENDIX 1: EU SECURITIES FINANCING TRANSACTIONS REGULATION FOR THE PERIOD ENDED JUNE 30, 2024

EU Securities Financing Transactions Regulation ("SFTR")

The Regulation 2015/2365 of the European Parliament and of the Council of November 25, 2015 on Transparency of Securities Financing Transactions and of Reuse (the "SFTR") entered into force on January 12, 2016 aiming to improve transparency in securities and commodities lending, reverse repurchase transactions, margin loans and certain collateral arrangements. Derivative contracts as defined by the EMIR are considered out of scope. None of the Sub-Funds held any investments in scope for Regulation (EU) 2015/2365 with any entity during the financial period.

1. Market value of assets engaged in securities financing transactions as at June 30, 2024 Reverse repurchase agreements – NIL.

Bank and its entities. In addition, the issuer shall also have arranged for an independent assessment on labelling the issue as "green", which may be in the form of second party opinion, verification, certification or Green Bond scoring/rating; and

ii. the Investment Manager was satisfied with the issuer's allocation report or information obtained following engagement or its other determinations in relation to use of proceeds for each Green Bond, based on the Investment Manager's investment criteria.

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

In order to ensure that sustainable investments do no significant harm to environmental sustainable investment objectives, the Investment Manager considers sovereign-related principal adverse impact indicators in respect of its issuer exposures (as detailed further below). In this regard, the Investment Manager uses a proprietary, data driven and qualitative assessment approach through its ESG Scoring Framework.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Investment Manager takes into account the indicators for adverse impacts on sustainability factors through its investment process and ESG Scoring Framework. The Investment Manager employs a systematic and structured framework to rank each country within its investment universe as regards exposure to ESG risks. The ESG risks which are taken into account are listed in the table below labelled 'Sovereign ESG Indicators' and further set out in the section "What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?". The Investment Manager applies this ESG Scoring Framework to all investments in the Fund. The Investment Manager employs a value-based investment approach and integrates ESG factors into its valuation framework for sovereign debt. The valuation of all countries within the investment universe will incorporate ESG factors, and these valuations will form part of the investment decisions of the Investment Manager. The ESG Scoring Framework is more fully set out below, and further in the Investment Manager's ESG Policy, which is available at www.colchesterglobal.com.

The Investment Manager considers each of the indicators applicable to investments in sovereigns and supranationals listed in Annex 1 Tables 1, 2 and 3 of the Level II SFDR Regulatory Technical Standards ("SFDR RTS"). Each of these indicators (with the exception of 'Green Securities' and 'non-cooperative tax jurisdictions') are fed into the ESG Scoring Framework. 'Green Securities' and 'non-cooperative tax jurisdictions' are separately monitored by the Investment Manager. In addition, the Investment Manager fully excludes from the investment universe sovereign issuers that are on the exclusion list, which is currently comprised of countries subject to a UN arms embargo.

Due to the investment strategy employed by the Fund, only the indicators applicable to investment in sovereigns and supranationals are relevant to the Investment Manager's consideration of principal adverse impacts.

The Fund's annual report shall disclose how principal adverse impacts on sustainability factors have been considered during the relevant reporting period.

 How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable as the Fund only invests in sovereign, supranational and agency debt.

Does this financial product consider principal adverse impacts on sustainability factors?

⊠Yes,

The Investment Manager considers each of the indicators applicable to investments in sovereigns and supranationals listed in Annex 1 Tables 1, 2 and 3 of the SFDR RTS. Each of these indicators (with the exception of 'Green Securities' and 'non-cooperative tax jurisdictions') are fed into the ESG Scoring Framework. 'Green Securities' and 'non-cooperative tax jurisdictions' are separately managed and considered by the Investment Manager. In addition, the Investment Manager fully excludes from the investment universe sovereign issuers that are on the exclusion list, which is currently comprised of countries subject to a UN arms embargo.

Due to the investment strategy employed by the Fund, only the indicators applicable to investment in sovereigns and supranationals are relevant to the Investment Manager's consideration of principal adverse impacts.

The Fund's annual report shall disclose the principal adverse impacts on sustainability factors during the relevant reporting period.

\square No What investment strategy does this financial product follow? The investment strategy The Fund's investment objective is to achieve favourable income and capital returns from a guides investment globally diversified portfolio of Green Bonds and currencies. An associated objective is the decisions based on factors preservation and enhancement of principal. such as investment objectives and risk The Investment Manager assesses and actively selects Green Bonds for investment by the tolerance Fund through its Green Bond Framework which is further outlined below. Green Bond investments in the portfolio are subject to ongoing monitoring by the Investment Manager for alignment with ICMA Green Bond Principles or any other national or supranational standards as outlined below. What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective? 100% of the fixed income securities held by the Fund will be in Green Bonds, which are bonds issued by governments, supra-nationals, agencies and other types of issuers to fund projects that benefit the environment. The Investment Manager's Green Bond Framework uses the same valuation framework, portfolio construction and risk management techniques as its other investment programmes. The Investment Manager then applies the following two additional steps that impact on which bonds are considered within the opportunity set, and its ongoing willingness to continue to hold them: Firstly, the Investment Manager makes an assessment to determine whether an issuer's green bond framework is aligned with ICMA's Green Bond Principles or any other national or supranational standards. The Investment Manager then assesses that the issuer has arranged for an independent second party opinion on the labelling of the issue as "green" or, in the absence of an independent second party opinion that the Investment Manager has made its own determination that the issue can be labelled as "green". Secondly, the Investment Manager will monitor on an annual basis issuers' use of proceeds reporting by looking at their allocation report. In the absence of an allocation report the Investment Manager will either engage with the issuer or make an appropriate determination based on information available. In the event that a security is no longer aligned with the ICMA's Green Bond Principles or any other applicable standards, in accordance with the Investment Manager's Global Green Bond Framework, then the Investment Manager will engage with the issuer to determine the circumstances around the change in determination as a Green Bond. If after engagement the Investment Manager considers that the security no longer meets the requirements of a Green Bond, it will sell the security as soon as reasonably practicable, taking into account the best interest of Shareholders. In most circumstances, the Investment Manager normally expects to divest within three months of its determination that the security is no longer considered a Green Bond. However, there may be circumstances beyond the Investment Manager's control, such as low liquidity, market disruption or other events, that may cause divesting to take longer. In addition to the Fund's investments in Green Bonds, the Investment Manager employs a

value-based investment approach and integrates ESG risks into its valuation framework for sovereign debt. Countries are assigned a proprietary Financial Stability Score (FSS) which combines an assessment of balance sheet and economic strength, with an assessment of ESG risks, and potential opportunities. The indicators and risk factors considered are set out in the table below. Each bond and currency market within the Fund's investment universe, is

assigned a FSS and this translates into a premium or discount being applied to the market's valuation. Whilst there are strong interlinkages between ESG factors and traditional balance sheet or "credit" metrics, the Investment Manager has developed a sovereign ESG Scoring Framework to measure and compare countries exposure specifically to ESG risks, in a systematic and consistent fashion. A series of publicly available metrics are used to assess ESG risks under a variety of categories. For example, environmental metrics consider a country's vulnerability to climate through two lenses, namely physical risk and transition risk. Physical risk relates to a country's sensitivity to the implications of climate change such as extreme weather events, whilst transition risk is concerned with the implications of adjusting to a low-carbon economy. The percentage of electricity generated from renewable sources is one metric the Investment Manager considers to assess transition risk. Social characteristics of a country are assessed via Human Capital i.e. the knowledge, skills and experience of the population, and Social Cohesion i.e. the levels of trust, accountability and equality prevailing in society. Governance standards such as the rule of law, property rights and financial freedom are also measured.

These metrics are distilled into a score for each country, which feeds into the Financial Stability Score and hence the valuation of each bond and currency market. A country with stronger ESG metrics and a more robust balance sheet than its peers will therefore be a more attractive investment ceteris paribus.

As a sovereign debt investor, the Investment Manager recognises the inherent dilemma in considering whether or not to exclude countries from its investment universe based on an assessment of sustainability metrics. In many instances such metrics are positively correlated to income per capita, and hence such exclusions run the risk of cutting off access to international capital for lower income countries. Such countries are often highly dependent on foreign capital to develop infrastructure, build human capital and underpin social stability. Hence, the Investment Manager will give careful consideration of the implications on a particular sovereign issuer when assessing whether to include it in the Fund's investment universe.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Not applicable - the Fund only invests in sovereign, supranational or agency debt.

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

A minimum of 90% of the Fund's investments will be sustainable investments with an environmental objective. The remaining portion of the Fund may be held in cash for liquidity purposes and to manage collateral in relation to currency forward contracts.

What is the policy to assess good governance practices of the investee companies?

100% of the fixed income securities held by the Fund will be in Green Bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

How does the use of derivatives attain the sustainable investment objective?

Derivatives are not used for the purposes of attaining the environmental objective of the Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy. There is currently no appropriate methodology to calculate Taxonomy-alignment in respect of exposures to central governments, central banks and supranational issuers ('sovereign exposures'). The Fund only makes investments in sovereign exposures.

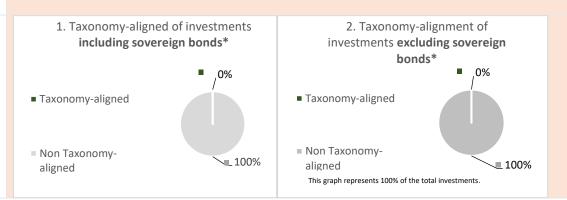

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy⁸?

□Yes:

☐ In fossil gas ☐ In nuclear energy

 \boxtimes No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

⁸ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

ANNEX annual/semi-annual report: additional Information for Swiss investors

1. Representative

The representative in Switzerland is CACEIS (Switzerland) S.A. (the "Swiss Representative"), route de Signy 35, CH-1260 Nyon, Switzerland.

2. Paying agent

The paying agent in Switzerland is CACEIS Bank, Montrouge, succursale de Nyon / Suisse, Route de Signy 35, CH-1260 Nyon.

3. Place where the relevant documents may be obtained

The Prospectus and the Key Information Document(s), the Memorandum & Articles of Association, the list of purchases and sales as well as the annual and semi-annual report of the Company may be obtained free of charge from the Swiss Representative.

4. Publications

In Switzerland, the issue and redemption price or the Net Asset Value of all classes of shares with the reference "Commissions not included" shall be published on the electronic fund information platform (www.swissfunddata.ch) every day on which shares are issued or redeemed.

5. Place of performance and jurisdiction

In respect of the shares offered in Switzerland, the place of performance is the registered office of the representative. The place of jurisdiction is at the registered office of the representative or at the registered office or place of residence of the investor.
