The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 10%.

Derivatives are not used for the attainment of the characteristics promoted by this financial product. Derivatives are primarily used for hedging and liquidity management purposes.

Monitoring of environmental or social characteristics

The portfolio manager has data indicators and a systemic pre-trade guideline control in place to monitor the stated environmental or social characteristics promoted by the financial product, specifically the binding targets stated in the investment strategy.

Methodologies

The performance of the indicators used to measure the environmental or social characteristics promoted by the financial product are monitored daily, measured monthly and reported annually.

Data sources and processing

The data sources used to attain the stated environmental or social characteristics are as follows:

Data is consumed from leading providers, processed in accordance with defined guidelines and supplemented with analyst recommendation

Limitations to methodologies and data

A minimum coverage threshold is applied for the data sources used to attain the stated environmental or social characteristics of the financial product, these thresholds ensure that the binding targets can be monitored and measured. Accuracy of data is dependent on 3rd party data providers. Coverage of data sources can be less than 100% due to uncovered asset types, incomplete or inconsistent data and gaps in the coverage of these 3rd party providers.

Due diligence

UBS conducts in-depth due diligence that is performed on the final candidates of external fund providers before on-boarding the funds to the UBS product universe (all funds, not only SI/ESG focused funds). Based on the collected information UBS develops a view on the quality of that investment process, and ESG intentionality, including its approach to ESG integration. The view is documented in the formal due diligence report. The due diligence process includes questionnaires and interviews where investment managers are asked to provide fund-specific information on ESG factors, e.g., how ESG factors are integrated within their investment process or what the company-wide ESG efforts are.

Engagement policies

The sub-fund makes indirect investments by investing in underlying target funds and investment strategies managed by third party fund providers. As such, the sub-fund does not hold any voting rights.
